### MEETINGS OF THE INTERNATIONAL COUNCIL OF OPHTHALMOLOGY

A meeting of the International Council of Ophthalmology will be held at the Royal College of Surgeons, Lincoln's Inn Fields, W.C.2, on Saturday, July 15th, at 2 p.m.

A further meeting of the Council will be held on Friday, July 21st, at Friends' House, immediately after the meeting of the Delegation. This meeting will be continued, if necessary, on Saturday, July 22nd, at 10 a.m. in the Secretary-General's room at Friends' House.

### REUNIONS DU CONSEIL INTERNATIONAL

Une reunion du Conseil International se tiendra au Royal College of Surgeons, Lincoln's Inn Fields, London, W.C.2, Samedi 15 Juillet à 14h.

Une nouvelle réunion du Conseil se tiendra Vendredi 21 Juillet à Friends' House immédiatement après la réunion de la Délégation et se poursuivra si nécessaire, Samedi 22 Juillet à 10h. dans le bureau du Secrétaire Général de Friends' House.

### REUNIONES DEL CONSEJO INTERNACIONAL

El sábado 15 de julio, a las 2 p.m., se celebrará una reunión del Consejo Internacional en The Royal College of Surgeons, Lincoln's Inn Fields, W.C. 2.

El Consejo se reunirá nuevamente el viernes 21 de julio en Friends House inmediatamente después de la asamblea de la Delegación. La reunión continuará, en caso necesario, el sábado 22 de julio, a las 10 a.m. en las oficinas de la Secretaría General, situadas en Friends House.

### DELEGATION OF REPRESENTATIVES OF NATIONAL OPHTHALMOLOGICAL SOCIETIES

The American Ophthalmological Society :

Dr. Bernard Samuels

The Ophthalmological Society of Australia :

Dr. J. B. Hamilton  
Dr. Cedric Cohen  
Dr. D. D. Paton  
Dr. Esmé Anderson  
Dr. Nancy Lewis

The Canadian Ophthalmological Society :

Dr. G. Stuart Ramsey

The Chinese Ophthalmological Society :

Dr. Eugene Chan

*Sweden*

The Ophthalmological Society of the United Kingdom :	Mr. R. C. Davenport

#### MEETINGS OF DELEGATION

An informal meeting of the Delegation will be held on Sunday, July 16th, 1950, at 2.30 p.m. in the Anatomy Theatre of University College, Gower Street, W.C.1, when the opinions of the different National Ophthalmological Societies concerning the matters to be discussed by the Delegation will be communicated.

The International Ophthalmological Delegation will meet at Friends' House, Euston Road, on Friday, July 21st, immediately after the Closing Ceremony.

#### AGENDA

1. Affiliation of the Delegatio Ophthalmologica to the Council for the Co-ordination of International Congresses of Medical Sciences.
2. The subscription of the National Societies.
3. Internationalization of spectacle prescriptions.
4. Internationalization of the denomination of the meridians of astigmatism.
5. Internationalization of visual standards for traffic.
6. Election of members to the Council. (See Art. V and VI, Madrid 1933).

### REUNIONS DE LA DELEGATION

Les Membres de la Délégation se réuniront le Dimanche 16 Juillet à 14h.30 dans l'amphithéâtre du Collège de l'Université, Gower Street, W.C.1, où leur seront communiquées les opinions des différentes Sociétés d'Ophthalmologie concernant les questions proposées par la Délégation.

La Délégation Internationale Ophthalmologique s'assemblera à Friends' House, Euston Road, vendredi, le 21 Juillet, immédiatement après la cérémonie de clôture.

#### AGENDA

1. L'Affiliation du Delegatio Ophthalmologica au Conseil pour la co-ordination des Congrès Internationaux des Sciences médicales.
2. La souscription des Sociétés nationales.
3. L'Internationalisation d'ordonnances pour les lunettes.
4. L'Internationalisation de la dénomination des méridiens de l'astigmatisme.
5. L'Internationalisation des degrés visuels pour le mouvement.
6. L'élection de Membres au Conseil (Voir Art. V et VI, Madrid, 1933).

### REUNIONES DE LA DELEGACION

El sábado 16 de julio, a las 2.30 p.m., tendrá lugar una reunión privada de la Delegación, en el Anfiteatro Anatómico del University College, Gower Street, W.C. 1, en la que se dará cuenta de las opiniones de las diferentes Sociedades Oftalmológicas Nacionales en relación con las materias que serán objeto de debate.

La Delegación Oftalmológica Internacional se reunirá en Friends' House, Euston Road, el viernes, 21 de julio, luego de terminada la inauguración.

#### AGENDA.

1. Afiliación de la Delegatio Oftalmologica al Consejo para la Co-Ordinación de Congresos Internacionales de Ciencias Médicas.
2. Cotizaciones de las Asociaciones Nacionales.
3. Internacionalización de las prescripciones de anteojos.
4. Internacionalización de las denominaciones de meridianos del astigmatismo.
5. Internacionalización de normas de visión para el tráfico.
6. Elección de vocales del consejo. (Véanse art. V y VI, Madrid, 1933).

### **REGISTRATION OFFICE AND BUREAU**

REGISTRATION will take place in the Old Library, British Medical Association House, Tavistock Square, W.C.1. The Old Library is situated on the ground floor and is entered from the courtyard of the British Medical Association. The Registration Office will be open on Saturday and Sunday, July 15th and 16th from 10 a.m. to 6 p.m., and will remain open from Monday to Friday from 9 a.m. to 6 p.m., and on Saturday from 9 a.m. to 1 p.m.

BUREAU. The Bureau for information and general services will be open at the same times as the Registration Office. It will be situated in the Hastings Hall, next door to the Old Library, British Medical Association House.

In the Registration Office and the Bureau the following services will be available :—

THE WOMEN'S VOLUNTARY SERVICES (W.V.S.) have representatives available to :

- sell meal tickets;
- advise on rationing;
- receive and deliver personal messages for members;
- supply stamps and post members' letters;
- send cables and telegrams;
- take orders for the official photograph;
- advise on restaurants and book tables;
- advise on shopping and help with export difficulties;
- supply bus and underground maps and give directions to any part of London;
- deal with lost property;
- deliver member's mail;
- give general information.

THOS. COOK & SON have representatives available to give advice regarding hotel accommodation and travel arrangements, and cash travellers' cheques.

THEATRE TICKETS AND MESSENGERS LTD. have representatives available to arrange sightseeing tours of London, reserve theatre tickets, and to give general information regarding amusements.

THE TRAVEL ASSOCIATION have an information stand.

STEWARDS AND INTERPRETERS. Stewards and interpreters will be available in the Bureau and elsewhere to help and direct members.

### **TICKETS**

It has been agreed that a separate colour shall be allocated to each day of the Congress to facilitate arrangements. These colours are as follows :—

Monday	...	...	...	...	White
Tuesday	...	...	...	...	Green
Wednesday	...	...	...	...	Buff
Thursday	...	...	...	...	Grey
Friday	...	...	...	...	Pink
Saturday	...	...	...	...	Blue

Wherever possible, all tickets, notices, etc., referring to a particular day will be printed in the colour of that day, so that Congressists will easily be able to check that they are handling the right tickets.

Tickets will be available for visits to hospitals and all social events. For all functions admission will be by ticket only and in most cases numbers are strictly limited so that early application is essential.

Invitations to the various receptions are enclosed with the Programme issued on registration. Members are requested to hand in their acceptance cards, or if unable to attend any function, to return their invitation card to their registration desk. The appropriate invitation card must be presented at each function.

It is pointed out that Scientific Associate Members are not eligible to attend any of the social functions or expeditions.

Tickets for all other social events must be collected and paid for at the appropriate desk.

### **MAIL**

Members should enquire at the W.V.S. desk in the bureau for mail.

### **OFFICIAL NOTICE BOARDS**

The two official notice boards of the Congress will be found in the Registration Office at British Medical Association House and at Friends' House, Euston Road.

### **TELEPHONES**

Telephones are available for the use of members. The official Congress telephone number is EUSton 5371/5, and may be used in cases of emergency. It is regretted that no attempt can be made to find members to take incoming calls personally, but messages will be taken by the W.V.S.

### **POST OFFICE**

The nearest post office is situated at 165 Euston Road, next door to Friends' House, but the W.V.S. will, on request, send cables and telegrams, supply stamps, and post members' letters.

#### **BANK**

The Tavistock Square Branch of the Westminster Bank Limited, British Medical Association House, Tavistock Square, London, W.C.1 (turn right (north) outside B.M.A. House) will afford banking facilities to members of the Congress for the cashing of travellers' cheques, letters of credit, and foreign exchange between the normal banking hours, i.e., from 10 a.m. to 3 p.m. from Monday to Friday, and from 9.30 a.m. to 12 noon on Saturday.

#### **CATERING ARRANGEMENTS**

Arrangements have been made for the provision of lunch and tea in the following places :—

**LONDON SCHOOL OF HYGIENE.**—Lunch will be available for 40 at a price of 1s. 6d. - 2s.; tea for 40 at a price of 1s. - 1s. 6d. Tickets for both lunch and tea *must* be obtained in the Bureau.

**UNIVERSITY COLLEGE.**—Lunch for 1,500 members and associates will be available in the Refectory at a price of 3s. 6d. Tickets for this lunch *must* be obtained in the Bureau. Tea will also be available, but tickets need not be obtained beforehand.

**ST. PANCRAS TOWN HALL.**—Lunch and tea for a small number will be available in the Restaurant. The price of lunch is 7s. 6d., and tickets will be available at the Town Hall.

**FRIENDS' HOUSE AND BRITISH MEDICAL ASSOCIATION HOUSE.**—Lunches will be available at Friends' House (200) and at British Medical Association House (100) at a price of 2s. at Friends' House and 3s. at British Medical Association House. Tickets for these lunches *must* be obtained in the Bureau.

Tea will be available at **BRITISH MEDICAL ASSOCIATION HOUSE** as already announced, in the thé dansant, at a price of 2s. a head. Tickets need not be obtained for the thé dansant, payment being made for tea at the time.

#### **BADGES**

The official badge of the Congress must be worn on all occasions. It will *not* be possible to obtain admission to the Opening and Closing Ceremonies, Scientific Sessions, or any of the Exhibitions, Excursions or Social Functions unless the badge is being worn.

**RIBBONS.** The officers of the Congress, the International Council and other officials will be wearing distinguishing ribbons.

The following is a key to the colours of these ribbons :

International Council	Red
President and Secretary-General	Light Blue
Committee	Royal Blue
Ladies Committee	White
Stewards	Grey
Interpreters	Green
Staff	Gold

### **CAR PARKING**

The attention of members is drawn to the following garages and car parks in the vicinity of the Congress meeting places :—

#### **GARAGES**

Woolfs Garage, Thornhaugh Mews, Woburn Square, W.C.1.

Daimler Hire Garage, Woburn Place, W.C.1.

St. Pancras Garage, Clare Court, Judd Street, W.C.1.

#### **CAR PARKS**

Gordon Square, east side.

Tavistock Square, north and west sides.

Bidborough Street, behind St. Pancras Town Hall.

Russell Square, south, north and west sides.

All members attending the Congress with cars are asked to obtain a windscreen label from the Bureau.

### **RATIONING**

As regulations stand at present, visitors to this country may spend up to 8 weeks in a hotel or hostel without applying for a ration book. Those staying at private addresses should go to the local Food Office with their passports soon after arrival.

### **BUREAU D'INSCRIPTION ET BUREAU GENERAL**

L'INSCRIPTION aura lieu dans le Old Library, British Medical Association House, Tavistock Square, W.C.1. Cet Old Library se trouve au rez-de-chaussée. La porte d'entrée est dans la cour de la British Medical Association. Ce Bureau sera ouvert samedi et dimanche le 15 et le 16 juillet de 10,00 à 18,00 heures et ensuite du lundi au vendredi inclus de 09,00 à 18,00 heures—le samedi de 09,00 à 13,00 heures.

BUREAU GENERAL. Le Bureau de renseignements et services généraux sera ouvert aux mêmes heures que le Bureau d'Inscription. Il se trouve au Hastings Hall, à côté du Old Library, British Medical Association House.

Aux Bureaux d'Inscription et Général se trouvent les services suivants :—

THE WOMEN'S VOLUNTARY SERVICES (W.V.S.)  
aura des députés prêts à :  
vendre des billets pour repas ;  
renseigner sur les questions de rationnement ;  
recevoir et transmettre les commissions personnelles des Délégués ;  
francir les lettres et les mettre à la poste ;  
envoyer les télégrammes ;  
accepter les commandes pour la photographie officielle ;  
renseigner sur les restaurants et retenir des tables ;

donner conseil pour achats et aider avec les difficultés d'exportation ;  
fournir des plans d'autobus et de métro et indiquer le chemin dans tous les arrondissements de Londres ;  
s'occuper des objets perdus ;  
distribuer le courrier aux délégués ;  
donner des renseignements généraux.

THOMAS COOK & SON ont des représentants capables à donner conseil à l'égard des hôtels et de voyage, et de payer des cheques de voyage.

THEATRE TICKETS & MESSENGERS LTD. ont des représentants prêts à arranger les tours dans Londres, obtenir des billets de théâtre et donner des renseignements généraux au sujet des distractions.

THE TRAVEL ASSOCIATION a un comptoir pour les renseignements.

REGISSEURS ET INTERPRETES. Les régisseurs et les interprètes seront trouvés au Bureau et autrepart pour donner conseil et aider les délégués.

#### BILLETS

On s'est décidé à assigner une différente couleur à chaque jour du Congrès pour faciliter les arrangements. Ces couleurs sont ainsi de suite : -

lundi	blanc
mardi	vert
mercredi	beige
jeudi	gris
vendredi	rose
samedi	bleu

On possible tous billets, affiches, etc., ayant à faire avec une journée particulière seront imprimés dans la couleur de ce jour-la pour que les délégués puissent se rassurer qu'ils ont les billets qu'il leur faut.

Il y aura des billets pour les visites aux hôpitaux et tout événement social. L'admission à toutes les manifestations nécessitera un billet qu'il est essentiel de demander à l'avance le nombre des places étant dans certains cas, strictement limité.

Les invitations aux diverses fêtes et réceptions, sont incluses dans le programme qui est distribué au moment d'enregistrement. Messieurs les délégués sont priés de remettre leurs cartes d'acceptation, ou, au cas où il leur sera impossible d'être présent à une réception de rendre leur carte d'invitation à la table où ils se sont inscrits. A toute réception la carte convenable doit être présentée. On est prié de remarquer que les membres associés scientifiques ne sont éligibles à prendre part à aucun événement social ni excursion.

Les billets pour tous les autres événements sociaux doivent être obtenus et payés au bureau approprié.

## **COURRIER**

Les délégués doivent demander leur courrier au bureau de W.V.S.

## **PORTE AFFICHES**

Les deux porte-affiches où se trouvera tout avis se rapportant au Congrès seront situés au Bureau d'Inscription à la British Medical Association House, et à la Friends' House, Euston Road.

## **TELEPHONES**

Il y aura des cabines téléphoniques destinées à l'usage des délégués. Le numéro téléphonique du Congrès est EUSTON 5371/5. On peut s'en servir en cas d'urgence. Il est malheureusement impossible d'essayer de trouver les délégués pour répondre personnellement au téléphone, mais les W.V.S. se chargeront de transmettre les messages.

## **BUREAU DE POSTE**

Le bureau de poste le plus proche est situé à 165 Euston Road à côté de la Friends' House, mais les représentants des W.V.S. sont prêts sur demande à transmettre les télégrammes, affranchir et mettre à la poste les lettres des délégués.

## **BANQUE**

La Succursale de Tavistock Square de la Westminster Bank Ltd., British Medical Association House, Tavistock Square, London, W.C.1 (tournez à droite (nord) en quittant British Medical Association House) donnera toute facilité aux délégués du Congrès pour l'encaissement des cheques de voyage, de lettres de crédit et de change extérieur aux heures normales, c'est à dire de 10.00 à 15.00 heures de lundi à vendredi, et de 09.30 à 12.00 le samedi.

## **REPAS**

Des arrangements ont été faits pour permettre aux membres de prendre leurs repas (déjeuner et thé) aux endroits suivants s'ils le désirent :

*London School of Hygiene and Tropical Medicine.* Déjeuner pour 40 personnes—prix 1/6d.—2/-d. (75 fr. à 100fr). Thé 1/- à 1/6d. (50fr. à 75fr.). Les billets pour le déjeuner et pour le thé doivent être pris à l'avance au Bureau.

*University College.* Déjeuner pour 1500 membres et Associés. Refectoire du Collège. Prix : 3/6d. (175fr.). Les billets pour le déjeuner doivent être pris à l'avance au Bureau. Le thé pourra être payé sur place.

*St. Pancras Town Hall.* Déjeuner pour un nombre limité. Restaurant de l'Hotel de Ville. Prix 7/6d. (375fr.). Les billets pour le déjeuner et pour le thé pourront être pris sur place.

*Friends' House et British Medical Association Houses.*  
Déjeuners à 2/- (100fr.) à Friends' House (200 personnes) ;  
à 3/- (150fr.) à British Medical Association House (100 personnes). Les billets devront être achetés à l'avance au Bureau.

Thé dansant à 2/- à British Medical Association House.  
Les billets pour le thé pourront être achetés sur place.

### PLAQUES

La plaque officielle du Congrès doit être portée sur toute occasion. Permission de prendre part aux Cérémonies inaugurale et terminale, réunions scientifiques, aucune des expositions, excursions ou événements sociaux ne sera accordée qu'à ceux qui portent une plaque.

*Rubans.* Les Officiers du Congrès, le Conseil International et les autres fonctionnaires porteront ces rubans distinctifs :—

Conseil International	rouge
Le Président et le Secrétaire Général	bleu clair
Comité	bleu foncé
Comité de Dames	blanc
Régisseurs	gris
Interprètes	vert
Personnel	or

### STATIONNEMENT DE VOITURES

Messieurs les délégués sont priés de se servir des garages et stations de voitures suivants :—

#### *Garages*

Woolf's Garage, Thornhaugh Mews, Woburn Square, W.C.1.

Daimler Hire Garage, Woburn Place, W.C.1.

St. Pancras Garage, Clare Court, Judd Street, W.C.1.

#### *Stations de Voitures*

Gordon Square, côté de l'est,

Tavistock Square, côtés du nord et de l'ouest.

Bidborough Street, derrière St. Pancras Town Hall.

Russell Square, côtés du sud, nord et de l'ouest.

Les Membres participant au Congrès ayant une auto devront se procurer l'insigne spécial au Bureau du Congrès.

### RAVITAILLEMENT

Les règlements permettent aux visiteurs en ce pays de rester 8 semaines dans un hotel ou pension sans carte de ravitaillage. Les délégués séjournant chez des amis sont conseillés de visiter aussitôt que possible le bureau de ravitaillage le plus proche, et de présenter leurs passports.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

**OFICINA DE INSCRIPCION Y OFICINA GENERAL**

LAS MATRICULACIONES se efectuarán en la Old Library, British Medical Association House, Tavistock Square, London, W.C. 1. La Old Library está en el piso bajo, con entrada a través del patio de la British Medical Association. La oficina de inscripción quedará abierta el Sábado y Domingo, 15 y 16 de julio de 10h00 a 18h00 y permanecerá abierta entre el lunes y el viernes de 9h00 a 18h00, y el sábado de 9h00 a 13h00.

OFICINA. La oficina para informes y servicios generales quedará abierta a las mismas horas que la oficina de inscripción. La oficina estará situada en Hastings Hall, al lado de la Old Library, British Medical Association House.

En la oficina de inscripción y la oficina general prestarán los servicios especificados más abajo :

LOS SERVICIOS VOLUNTARIOS FEMENINOS (W.V.S.) (WOMEN'S VOLUNTARY SERVICES) tendrá representantes disponibles para :

- venta de billetes para la comida ;
- advertencia relacionada con el racionamiento ;
- recibir y llevar mensajes personales para socios ;
- suministrar sellos y echar cartas en el correo ;
- enviar cablegramas y telegramas ;
- tomar pedidos por la fotografía oficial ;
- aconsejar sobre fondas y mandar reservar mesas ;
- aconsejar sobre compras y asistir con las formalidades de exportación ;
- suministrar mapas de los servicios de omnibus y ferrocarril subterráneo y enseñar el camino de cualquier parte de Londres ;
- ocuparse de los objetos perdidos ;
- entregar el correo a los socios ;
- dar informes en general ;

La casa THOS. COOK AND SON tiene representantes disponibles para aconsejar sobre hoteles, viajes y pagar cheques de viajeros.

THEATRE TICKETS AND MESSENGERS LTD. tienen representantes disponibles para proyectar visitas a lugares interesantes en Londres, reservar localidades y proporcionar informes en general sobre diversiones.

THE TRAVEL ASSOCIATION tiene un stand de informes.

STEWARDS Y INTERPRETES. En la oficina y en otras partes habrá stewards y intérpretes para servir y asistir a los socios.

**BILLETES**

Con el fin de facilitar las disposiciones se ha acordado asignar un color diferente a cada día del Congreso.

Estos colores son los que siguen:

Lunes	..	..	..	..	Blanco.
Martes	..	..	..	..	Verde.
Miércoles	..	..	..	..	Anteado.
Jueves	..	..	..	..	Gris.
Viernes	..	..	..	..	Rosa.
Sábado	..	..	..	..	Azul.

Siempre que sea posible, todos los billetes, avisos etc. relativos a un dia particular del Congreso estarán impresos sobre papel del color de dicho dia, para que los Congresales puedan cerciorarse con facilidad si tienen en mano los billetes apropiados.

Se despacharán billetes para las visitas a los hospitales y todas las funciones sociales.

La entrada en todas las funciones será exclusivamente con billetes, y como en la mayoría de los casos el número de billetes está estrictamente limitado, es esencial solicitarlos con antelación.

Los convites para las varias funciones acompañarán a los programas que serán entregados a los socios en la Matrícula. Se ruega hagan favor de devolver las esquelas de aceptación, o de no poder asistir a ninguna de las funciones, devolver la esquela de convite a la Matrícula. La esquela de convite apropiada debe ser enseñada para la entrada a cada función.

Se hace constar que los Socios Extraordinarios Científicos no tienen el derecho de asistir a las funciones a excusiones sociales.

Los billetes para todas las otras funciones sociales deben pedirse y pagarse al bufete apropiado.

### CORREOS

El bufete W.V.S. en la Oficina entregará el correo a los Socios a pedido.

### TABLAS DE AVISOS OFICIALES

Las dos tablas de avisos oficiales del Congreso se encontrarán en la Matrícula en British Medical Association House, y en Friends' House, Euston Road.

### TELEFONOS

Habrá teléfonos instalados para la conveniencia de los socios. El número de teléfono oficial del Congreso es EUSton 5371/5 y puede llamarse en casos de urgencia. Con pesar se hace constar que no resultará posible procurar a los Socios que estén llamados al teléfono, pero se entregarán recados por intermedio del W.V.S.

### **CORREO**

El correo más cercano está sito en 165 Euston Road, junto a Friends' House, pero el W.V.S. se encargará, a pedido, a enviar cablegramas y telegramas, proporcionar, sellos y echar cartas en el correo.

### **BANCO**

La sucursal de Tavistock Square del Westminster Bank Limited, en British Medical Association House, Tavistock Square, London, W.C. 1 (vuelta a la derecha (norte) fuera de B.M.A. House) ofrece a los socios del Congreso las facilidades bancarias para el cobro de cheques de viajeros, letras de crédito y cambios, durante las horas bancarias normales, a saber de las 10h00 a las 15h00 de lunes a viernes, y de las 9h30 a las 12h00 los sábados.

### **ORGANIZACION DE APROVISIONAMIENTO**

Se facilitarán almuerzos (lunches) y meriendas (teas) en los lugares siguientes :

LONDON SCHOOL OF HYGIENE. Se servirán hasta 40 almuerzos a precio de 1 chelin con 6 peniques y 2 chelines, y hasta 40 meriendas, a precio de 1 chelin con 6 peniques. Los billetes para almuerzos y meriendas deberán solicitarse en la oficina.

UNIVERSITY COLLEGE. Se servirán hasta 1500 almuerzos a miembros y asociados en el Refectorio, a precio de 3 chelines con 6 peniques. Los billetes para estos almuerzos deberán solicitarse en la oficina. También se servirán meriendas, aun cuando no será necesario obtener los billetes por anticipado.

St. PANCRAS TOWN HALL. Se servirá un número muy limitado de almuerzos y meriendas en el restaurant. El precio del almuerzo sera de 7 chelines con 6 peniques, y los billetes podrán obtenerse en el Town Hall.

FRIENDS' HOUSE y BRITISH MEDICAL ASSOCIATION HOUSE. En la primera, se servirán hasta 200 almuerzos y en la segunda hasta 100, al precio de 2 chelines y 3 chelines, respectivamente. Los billetes para estos almuerzos deberán obtenerse en la oficina.

Como se indica en otro lugar, se servirán meriendas (THE DANSANTS) en el edificio de la British Medical Association, al precio de 2 chelines por persona. No se requiere obtener por adelantado los billetes para estas meriendas, satisfaciéndose su importe en el propio lugar.

### **INSIGNIAS**

La insignia oficial del Congreso se debe llevar en todas las ocasiones. No será posible dar entrada a las Ceremonias de Inauguración y de Conclusión, ni a las Sesiones Científicas

ni a cualquiera de las Exposiciones, Excursiones o Funciones Sociales a menos que se lleve la insignia.

CINTAS. Los oficiales del Congreso, del Consejo Internacional y otros oficiales llevarán cintas distintivas.

Hé aqui una indicación de las colores de dichas cintas :

Consejo Internacional	..	..	Roja.
Presidente, Secretario General	..	..	Azul Claro.
Comité	..	..	Azul de Rey.
Comité de las Damas	..	..	Blanca.
Stewards	..	..	Gris.
Intérpretes	..	..	Verde.
Personal	..	..	Oro.

### ESTACIONAMIENTO DE COCHES

Se llama la atención de los Socios hacia las siguientes garages y parques de estacionamiento que están cerca de los lugares de reunión del Congreso :

#### GARAGES :

Woolfs Garage, Thornhaugh Mews, Woburn Square, W.C. 1.

Daimler Hire Garage, Woburn Place, W.C. 1.

St. Pancras Garage, Clare Court, Judd Street, W.C. 1.

#### PARQUES DE ESTACIONAMIENTO :

Gordon Square, Lado del Este.

Tavistock Square, Lados del Norte y Oeste.

Bidborough Street, detrás de St. Pancras Town Hall.

Russell Square, lados de Sur, Norte y Oeste.

Se interesa de los miembros que asistan a los actos del Congreso en automóvil, se provean de una etiqueta para fijar en el parabrisas.

### RACIONAMIENTO

Según los reglamentos en vigor en la actualidad, los visitantes en Inglaterra pueden demorar hasta 8 semanas en cualquier hotel o fonda sin precisar de libros de racionamiento. Los visitantes alojados en casas particulares deben presentarse en la Oficina de Racionamiento local, con sus pasaportes, poco después de llegados en Londres.

Discours du Président du Conseil International d'Ophthalmologie.

Discours d'inauguration par les Représentants des Continents :

Europe : Dr. Edward Hartmann

Amérique du Nord : Dr. John H. Dunnington

Amérique du Sud : Prof. R. Arganaraz

Asie : Sir Jamshedji Duggan

Afrique : Prof. A. F. El-Tobgy

Australasie : Dr. J. Ringland Anderson

Présentation par le Président du Conseil International de la Médaille Gonin au Dr. H. Arruga.

### **CEREMONIA INAUGURAL**

#### **Lunes, 17 de Julio, a las 10.30 a.m.**

Apertura del Congreso por His Royal Highness The Duke of Gloucester, K.G.

Discurso del Presidente.

Discurso del Presidente del Consejo Internacional de Oftalmología.

Discursos de apertura por los representantes de los Continentes :

Europa : Dr. Edward Hartmann

América del Norte : Dr. John H. Dunnington.

América del Sur : Prof. R. Arganaraz.

Asia : Sir Jamshedji Duggan.

Africa : Prof. A. F. El-Tobgy.

Australasia : Dr. J. Ringland Anderson.

Entrega de la Medalla Gonin al Dr. Arruga por el Presidente del Consejo Internacional.

#### **OFFICIAL PHOTOGRAPH**

The official Congress photograph will be taken in the quadrangle of University College at 12 noon on Monday, July 17th. All Members, Scientific Associates and Associates are requested to be present. Orders for prints will be taken at the W.V.S. Bureau where proofs will be available. Prints will be sent direct to members' home addresses.

#### **PHOTOGRAPHIE OFFICIELLE**

Une photo officielle du Congrès sera prise dans la Cour de University College lundi 17 juillet à midi. Tous les Membres, Associés et Associés Scientifiques sont priés d'être présents. Les épreuves seront déposées au Bureau des W.V.S. Les copies seront ensuite envoyées directement aux Membres qui en auront fait la commande.

#### **FOTOGRAFIA OFICIAL**

La fotografía oficial del Congreso será impresionada en el cuadrángulo del "University College," a mediodía del lunes 17 de julio. Se ruega a todos los miembros, asociados científicos y asociados, que estén presentes. Se recibirán peticiones de copias de esta fotografía en la Oficina de W.V.S., donde podrán recogerse. Se enviarán copias directamente al domicilio de los que lo soliciten.

#### **CLOSING CEREMONY**

1. Business procedure.
  - (a) Venue of the next Congress.
  - (b) Consideration of the proposals of the Delegation.
2. Closing speeches of the Delegates.

#### **CEREMONIE DE CLOTURE**

1. Affaires courantes.
  - (a) Venu du prochain Congrès.
  - (b) Etude des propositions de la Délégation.
2. Discours de clôture des Délégués.

### **CEREMONIA DE CLAUSURA**

1. Detalles administrativos.
  - (a) Lugar de celebración del nuevo Congreso.
  - (b) Estudio de las propuestas de la Delegación.
2. Discursos de clausura por los Delegados.

### **SCIENTIFIC PROGRAMME**

#### **Rules of Procedure for Meetings**

1. The Chairman will be responsible for the conduct of the meeting.
2. Speakers opening the two main discussions are allotted 15 minutes, while those delivering separate papers at the other meetings are allotted 10 minutes. (See articles 4 and 8 of the rules of the Congress.)
3. Those taking part in the discussions following papers are allotted 5 minutes.
4. Speakers are required to keep strictly within their time. Since the entire time of the Congress is fully taken up, it is necessary to keep to the programme and every endeavour should be made that each speaker starts at his scheduled time. Twenty minutes is reserved for each individual paper, with the general intention that 10 minutes will be devoted to the paper and 10 minutes to the discussion.
5. All speakers whose names are not on the programme are asked to announce their names at the beginning of their remarks. When they have finished speaking they will be asked to write their remarks on the paper given them by the editorial representative, and return it to him before the end of the meeting. If this is not done, their contributions to the discussions will not be included in the published Transactions.
6. Practically all the papers are in one or other of the three official languages, but those participating in the discussions may talk in any language they choose.
7. Copyright of all papers read at the Congress rests with the Executive Committee.

### **PROGRAMME SCIENTIFIQUE**

#### **Procédé des Réunions**

1. Le Président se fera responsable pour la conduite de la Réunion.
2. Les Orateurs qui commencent les deux discussions principales sont accordés 15 minutes, tandis que ceux qui donnent des discours aux autres Réunions sont accordés 10 minutes (Voir Art : 4 et 8 des Règlements du Congrès).
3. Ceux prenant part aux discussions qui suivent les discours sont accordés 5 minutes.

4. Les orateurs sont priés de ne pas excéder ces temps. Puisque chaque moment du Congrès est rempli il est nécessaire d'adhérer strictement au programme et on doit faire tous ses efforts pour que chaque orateur commence son discours au moment indiqué. Une période de 20 minutes est réservée pour chaque discours —c'est à dire 10 minutes pour le discours et 10 minutes pour discussion.
5. Tous ceux dont les noms ne sont pas sur le programme sont priés de s'annoncer par nom avant de commencer leur commentaire. Quand ils auront fini de parler on leur demandera d'écrire ce qu'ils viennent de dire sur le papier qui leur sera offert par un représentant éditorial, et de lui rendre avant le fin de la Réunion. Autrement leurs contributions aux discussions ne seront pas incluses dans le compte rendu.
6. Presque tous les discours seront donnés dans l'une ou l'autre des 3 langues officielles, mais tous ceux prennent part aux discussions peuvent se servir de la langue qu'ils préfèrent.
7. Le droit de réproduction de tous discours donnés au Congrès reste avec le Comité Exécutif.

MONDAY, JULY 17th

Afternoon, 2 to 4.30 p.m.

HALL A

Chairman: SIR STEWART DUKE-ELDER

1. 2 p.m.

**BARRAQUER MONER, J.** (Spain). Queratoplastia. Problemas que plantea la fijación del injerto.

53. 10.15 a.m.

CASTROVIEJO, R. (U.S.A.). Keratoplasty; re-transplants; unusual cases.

54. 10.30 a.m.

MUSINI, A., RAVERDINO, E., and MORGANTI, G. (Italy). La blefaroptosi congenita - suoi aspetti genetici e clinici.

55. 10.40 a.m.

JOSEPH, E., and OFFRET, G. (France). Observations biologiques post-opératoires après kératoplastie.

56. 10.50 a.m.

SOHY BEY, M. (Egypt). Personal experiences with the different forms of keratoplasty in Egypt.

57. 11 a.m.

THOMAS, C. I. (U.S.A.). Indications for and technique of corneal transplant in aphakia and ectopia of the lens.

58. 11.15 a.m.

TUDOR THOMAS, J. W. (U.K.). Keratoplasty; some technical considerations.

11.25 a.m. to 12.30 p.m.

DISCUSSION.

## HALL B

*Chairman: PROFESSOR J. CHARAMIS*

59. 9.30 a.m.

LEDERMAN, M. (U.K.). Radiotherapy in non-neoplastic diseases of the eye.

60. 9.50 a.m.

DUGGAN, SIR JAMSHEDJI, and CHITNIS, V. K. (India). Two unusual cases treated successfully by radium.

61. 10.10 a.m.

ALVARO, M. E., SILVA, M. A., FRIED, C., and MAFFEI, W. E. (Brazil). Experimental and clinical effects of X-rays in the treatment of uveitis.

62. 10.35 a.m.

ILIFF, C. E. (U.S.A.). Present status of Beta irradiation in ophthalmology.

63. 10.55 a.m.

MARIN-AMAT, M. (Spain). La dacriocistorinostomía actual.

64. 11.15 a.m.

BEIRAS GARCIA, A. (Spain). Fotodacriocistoscopía.

65. 11.35 a.m.

RYCROFT, B. W. (U.K.). The treatment of epiphora caused by absence of the lacrimal sac.

66. 12 noon

DE ROETTII, A. F. M., SNR. (U.S.A.). The dry eye.

HALL C

Chairman: DR. H. MOUTINHO

67. 9.30 a.m.  
VON BAHR, G. (Sweden). On the effect of chromatic aberration on vision.

68. 9.50 a.m.  
LONGIFNA, L. (Italy). Distacco di retina e afachia.

69. 10.10 a.m.  
LYLE, T. KEITH (U.K.). The present position of orthoptics in the treatment of manifest and latent strabismus.

70. 10.35 a.m.  
RØNNE, G. (Denmark). Some observations on normal and abnormal binocular vision.

71. 10.55 a.m.  
DUNLAP, E. A. (U.S.A.). Principles and choice of surgery in vertical muscle imbalances.

72. 11.15 a.m.  
THOMAS, PH. (Lebanon). Nouveau procédé d'allongement et de raccourcissement musculaire; premiers essais de greffe musculo-aponevrotique dans l'opération du strabisme.

73. 11.35 a.m.  
BROWN, E. V. L. (U.S.A.). A comparison of the refraction of strabismic eyes with that of non-strabismic eyes from birth to the 25th year.

74. 12 noon  
ANDERSON, J. RINGLAND (Australia). Post-operative progression or "drift" in convergent strabismus.

Afternoon, 2 to 4.30 p.m.

HALL A

Chairman: DR. E. DIAZ-CANEJA

75. 2 p.m.  
WOODS, A. C. (U.S.A.). A clinical study of streptococcal bacterial hypersensitivity in non-granulomatous uveitis.

76. 2.20 p.m.  
STONE, L. S. (U.S.A.). The development of normal and reversed vision in transplanted eyes.

77. 2.40 p.m.  
DIMSDALE, H. (U.K.). Some ophthalmological manifestations of cerebral atrophy.

78. 3 p.m.  
RAVERDINO, E. (Italy). Cantotomia permanente interna nella cura chirurgica della blefarofimosi accompagnata a ptosi congenita.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

79. 3.20 p.m.

POYALES URENA, A. (Spain). Tratamiento quirúrgico de la miopía.

80. 3.40 p.m.

TRANTAS, N. G. (Greece). Sur la nature de veines aqueuses de Ascher.

81. 4 p.m.

FRITZ, A. (Belgium). La correction panfocale de la presbyopie.

THURSDAY, JULY 20th

*Morning, 9.30 a.m. to 12.30 p.m.*

HALL A

*Chairman: DR. CONRAD BERENS*

**DISCUSSION:** "The clinical and social aspects of heredity in ophthalmology."

**Openers:** 82. Professor L. H. Snyder—Norman, Oklahoma.  
83. Miss Ida Mann—London.  
84. Professor A. Franceschetti—Geneva.

*Taking part in the discussion:*

Arkin, W. (Poland)  
Riddell, W. J. B. (U.K.)  
Waardenburg, P. J. (Belgium)  
Pritikin, R. I. (U.S.A.)  
François, J. (Belgium)  
Massoud, F. (Egypt)  
Pagan, M. (Italy)  
Lytle Gowens, H. (U.S.A.)  
Schupfer, F. (Italy)  
Buschke, W. H. (U.S.A.)  
Musini, A. (Italy)  
Mutch, J. R. (U.K.)  
Franceschetti, A. (Switzerland)  
Chomé, N. (Switzerland)  
Salgado Gomez, E. (Spain)  
Blum, J.-D. (Belgium)  
Argañaraz, R. (Argentina)

*Afternoon, 2 to 4.30 p.m.*

HALL A

*Chairman: MR. M. H. WHITTING*

85. 2 p.m.

BOEDER, P. (U.S.A.). Aniseikonia—theoretical aspects.

86. 2.10 p.m.

BURIAN, H. M. (U.S.A.). Aniseikonia—clinical aspects.

Approved For Release 2003/12/02<sup>50</sup> : CIA-RDP80-00926A002900050023-2

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

87. 2.30 p.m.  
REESE, A. B., and BLODI, F. (U.S.A.). Retrolental fibroplasia.

88. 2.50 p.m.  
KIRBY, D. B. (U.S.A.). Three years' experience with general akinesia (curare) in cataract surgery.

89. 3 p.m.  
THOMPSON, J. P. (U.S.A.) The cataract section analysed and improved.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

100. 3.40 p.m.  
WERNER, L. E., and MACDOUGALD, T. J. (Eire). Low tension glaucoma, its diagnosis and treatment.

101. 4 p.m.  
SOURDILLE, G. P., and HERVOUET, F. (France). Statistique d'operations fistulantes dans le glaucome chronique simple.

#### HALL C

*Chairman: DR. B. SEMADENI*

102. 2 p.m.  
TANSLEY, K. (U.K.). The physiological basis of electro-retinography.

103. 2.10 p.m.  
KARPE, G. (Sweden). The clinical applications of electro-retinography.

104. 2.20 p.m.  
HENKES, H. E. (Holland). The use of electroretinography in disturbances of the retinal and choroidal circulation.

105. 2.55 p.m.  
BASAR, I. (Turkey). Un cas de syndrome de Vogt-Koyanagi et ulcus rodens.

106. 3.15 p.m.  
RIDDELL, W. J. B. (U.K.). The sex difference in European iris colour.

107. 3.35 p.m.  
CAMPUZANO, H. (Paraguay). Manifestaciones oculares de la enfermedad de Nicolas, Favre y Durand.

108. 3.55 p.m.  
PAGANI, M. (Italy). Pathogénie des manifestations oculaires dans la leptospirose.

#### FRIDAY, JULY 21st

*Morning, 9.30 a.m. to 12.30 p.m.*

#### HALL A

*Chairman: PROFESSOR M. E. ALVARO*

109. 9.30 a.m.  
SUGAR, H. S. (U.S.A.). Concerning the etiology of simple glaucoma.

110. 9.40 a.m.  
COURTIS, B., and NUNEZ, R. B. (Argentina). Teoría sobre la patogenia del glaucoma primario.

111. 9.50 a.m.  
MARIN ENCISO, E. (Spain). Emoción y glaucoma.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2<sup>52</sup>

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

112. 10 a.m.

CRISTINI, G. (Italy). The rationale of ocular hypertension in glaucoma. The common pathological basis for hypertension and nervous atrophy.

113. 10.15 a.m.

BIETTI, G. B. (Italy). Di un nuovo "test" per la diagnosi precoce del glaucoma: il comportamento della macchia cieca nella compressione dinamometrica sperimentali del bulbo oculare.

114. 10.25 a.m.

STOCKER, F. W. (U.S.A.). Systemic use of newer sympatholytics and parasympathetic stimulants for influencing the intraocular pressure.

115. 10.35 a.m.

BARKAN, O. (U.S.A.). Glaucoma induced by air blockade. Clinical observation and experimental study.

116. 10.45 a.m.

COPPEZ, L., and ZANEN, J. (Belgium). Importance de la fistulisation dans l'opération d'Elliot.

117. 11 a.m.

WEEKERS, R. (Belgium). Les indications de la cyclodiatérmie non perforante thermométrique dans le traitement de l'hypertension intraoculaire.

118. 11.10 a.m.

BERENS, C., SHEPPARD, L. B., and DUEL, A. B. (U.S.A.). The surgery of glaucoma. A report of 108 cycloelectrolysis and 766 cyclodiathermy operations.

119. 11.20 a.m.

PREZIOSI, SIR LUIGI (Malta). 25 years of galvano-cautery puncture in the treatment of glaucoma.

120. 11.30 a.m.

NEAME, H. (U.K.). Experimental investigation into the effect of electro-cautery puncture and diathermy puncture:

1. in human cadaver liver tissue and
2. into the anterior chamber of the rabbit's eye (subconjunctival).

Report on 20 cases of Preziosi's operation for glaucoma.

11.40 a.m. to 12.30 p.m.

DISCUSSION.

## HALL B

Chairman: PROFESSOR K. LINDNER

121. 9.30 a.m.

TSOPELAS, B. (Greece). Sur une conception pathogénique nouvelle de l'arachnodactylie.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

122. 9.50 a.m.

WAARDENBURG, P. J. (Holland). A new syndrome: blepharophimosis by dystopia canthi medialis latero-versa, hypertrichosis supercili, a strand of white hair, heterochromia iridum and deaf mutism.

123. 10.10 a.m.

COX, R. A. (U.S.A.). Ocular brucellosis.

124. 10.30 a.m.

SCHEPENS, C. L. (U.S.A.). Examination of the ora serrata region—its clinical significance.

125. 10.50 a.m.

HRUBY, K. (Austria). Progress in slit-lamp microscopy of the posterior section of the eye.

126. 11.15 a.m.

DEJEAN, Ch., and GASSENC, R. (France). Note sur les aspects cliniques et biomicroscopiques de l'hyalite tuberculeuse.

127. 11.35 a.m.

WOLFF, E., and PENMAN, G. G. (U.K.). The position occupied by the peripheral retinal fibres in the nerve fibre layer and at the nerve-head.

128. 11.55 a.m.

BUSACCA, A. (Brazil). Quelques aspects de l'endothélium cornéen en biomicroscopie et sur des préparations histologiques à plat.

## HALL C

Chairman: COL. SIR JAMSHEDJI DUGGAN

129. 9.30 a.m.

ASHTON, N. (U.K.). The pathology of retinal micro-aneurysms.

130. 9.50 a.m.

DE LAET, H.-A., HUBINOT, P. O., and BLACKMAN, J. H. (Belgium). L'hypertension artérielle rétinienne dans l'éclampsie et dans les toxémies du dernier tiers de la grossesse.

MUCH, V. (Israel). L'hypophyse et les ostéopathies.

133. 10.55 a.m.

CATTANEO, D. (Italy). Esistono segni oftalmoscopici differenziali nelle ipertensioni arteriose?

134. 11.15 a.m.

CRUTHIRDS, A. E. (U.S.A.). The rôle of sulphhydryl in tissue respiration and repair as applied to burns in ophthalmology.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

135. 11.35 a.m.  
DUBOIS-POULSEN, A., and MILLER, H. A. (France). Valeur comparée des signes sphygmoscopiques et anatomiques rétinien dans l'hypertension artérielle.

136. 11.55 a.m.  
LANDAU, J., and BROMBERG, Y. M. (Israel). Dark adaptation at the climacteric.

137. 12.15 p.m.  
CAVKA, V. (Yugoslavia). Total perforating keratoplasty.

**PROGRAMME OF FILMS**  
in  
The Auditorium of the Wellcome Research Institution,  
183 Euston Road, London, N.W.1

**PROGRAMME DE FILMS**

**PROGRAMA DE LOS FILMS**

**MONDAY, JULY 17th**

*Afternoon, 2 p.m.*

*2 p.m.*  
PAGANI, M. (Italy). Greffe cornéenne.

*2.12 p.m.*  
STONE, L. S. (U.S.A.). Functional polarization of the retina and the development of vision in transplanted embryonic salamander eyes.

*2.27 p.m.*  
STONE, L. S. (U.S.A.). Lens regeneration from cells of the dorsal iris tissue and factors controlling it.

*2.42 p.m.*  
DEJEAN, C. (France). Technique personnelle de l'opération du strabisme.

*2.54 p.m.*  
HOLMES, W. J. (Hawaii). Early diagnosis and ocular complications of leprosy.

*3.15 p.m.*  
PRITIKIN, R. I. (U.S.A.). Ophthalmic surgery under field conditions.

*3.45 p.m.*  
Lijo PAVIA, J. (Argentina). Demostración cinematográfica de la tonoscopia.

*3.55 p.m.*  
RAVERDINO, E. (Italy). La cura chirurgica delle ametropie.

*4 p.m.*  
COZPEZ, L. (Belgium). Kératoplastie lamellaire.

*4.15 p.m.*  
HAZARI, K. (India). Chromo-therapy. Treatment of eye-diseases by coloured lights.

**WEDNESDAY, JULY 19th**

**Morning, 9.30 a.m.**

*9.30 a.m.*

MEYER, R. C. J. (South Africa). Intracapsular cataract extraction.

*9.52 a.m.*

D'ANDRADE, L. (Portugal). L'extraction de la cataracte au moyen de la zonulotomie et compression.

*10 a.m.*

BERKE, R. N. (U.S.A.). Cataract surgery in India.

*10.25 a.m.*

POLALES URENA, A. (Spain). Tratamiento quirúrgico de la miopía.

*11.24 a.m.*  
HOLMES, W. J. (Hawaii). The implantation operation for enucleation.

*11.41 a.m.*  
FAVORY, A. (France). Opération du ptosis.

*11.51 a.m.*  
BEHRMAN, S., and HANSELL, P. (U.K.). Latent nystagmus.

*12.05 p.m.*  
LANDEGGER, G. P. (U.S.A.). Two corneal transplantations from one donor eye.

**PROGRAMME OF OPERATING SESSIONS**  
**PROGRAMME DES SESSIONS OPERATOIRES**  
**PROGRAMA DE SESIONES DE OPERACIONES**

**MONDAY, JULY 17th**

2—4 p.m.	Mr. E. F. King and Mr. P. D. Trevor-Roper Mr. P. McG. Moffatt	Westminster Hospital, Horseferry Road Moorfields Hospital— Royal Westminster Branch, Holborn
	Mr. C. Dee Shapland Mr. H. B. Stallard	Moorfields Hospital— City Road

**TUESDAY, JULY 18th**

9 a.m.—		Middlesex Hospital
12 noon	Mr. M. H. Whiting and Mr. A. J. B. Goldsmith	
10 a.m.—		London Hospital St. Mary's Hospital
12 noon	Mr. J. E. M. Ayoub Mr. A. G. Cross and Mr. F. A. Williamson- Noble	
2—4 p.m.	Mr. A. Lister	Moorfields Hospital— City Road

**WEDNESDAY, JULY 19th**

10 a.m.—		Moorfields Hospital— City Road
12 noon	Mr. A. G. Leigh	Royal Eye Hospital
	Miss J. Dollar	Moorfields Hospital— City Road
2—4 p.m.	Mr. J. D. M. Cardell Mr. A. Seymour Philips	Moorfields Hospital— Royal Westminster Branch, Holborn

**THURSDAY, JULY 20th**

2—4 p.m. Mr. G. G. Penman

Moorfields Hospital—  
Royal Westminster  
Branch, Holborn  
Guy's Hospital

Mr. O. G. Morgan

**FRIDAY, JULY 21st**

10 a.m.—

12 noon Miss J. Dollar

Royal Eye Hospital  
Moorfields Hospital—  
Royal Westminster  
Branch, Holborn

2—4 p.m. Mr. E. Wolff

**SATURDAY, JULY 22nd**

10 a.m.—

12 noon Mr. A. Seymour Philips

Moorfields Hospital—  
Royal Westminster  
Branch, Holborn

**DEMONSTRATIONS**

Tickets for all demonstrations must be obtained at the Bureau.

***Institute of Ophthalmology***

The Institute of Ophthalmology, situated in Judd Street, London, W.C.1 (500 yards due south of the Trade Exhibition in the St. Pancras Town Hall) is the post-graduate teaching and research school of the University of London, and is affiliated with Moorfields, Westminster and Central Eye Hospital.

On the afternoon of Wednesday, 19th July, it will be open from 2.30 to 4.30 p.m., when all departments—pathology, medical illustration, physiology, chemistry, etc.—will be on view.

The following demonstrations have been arranged, commencing about 2.30 p.m., for which tickets will be available in the Bureau at B.M.A. House. Owing to the impossibility of large numbers seeing the demonstrations with any satisfaction, admission to these demonstrations will be to ticket holders only.

1. *Measurement of the rate of flow of aqueous humour.*

The injection of radio-active isotopes into the anterior chamber and their subsequent estimation.

By D. M. Maurice.

2. *Studies on the intra-ocular pressure.*

The effects of nitrogen mustard and sympathetic stimulation.

By H. Davson, E. S. Perkins and D. P. Greaves.

3. *Hyaluronidase spreading reaction.*

By A. M. Woodin.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

- 4. *Technique for collection and estimation of human tears.*  
By A. Giardini and J. R. E. Roberts.
- 5. *Measurement of the thickness of the cornea.*  
By D. M. Maurice and A. Giardini.
- 6. *Some experiments on the physiology of the fovea.*  
A method of obtaining apparently increased sensitivity of a photographic emulsion.  
By Professor H. Hartridge, F.R.S.
- 7. *Demonstration of electro-physiology of the retina.*  
By L. C. Thomson.
- 8. *Absorption spectra of visual pigments.*  
By H. J. A. Dartnall.
- 9. *Subjective experiments on vision.*  
By R. A. Weale.
- 10. *Demonstration of polarization phenomena of retinal rods.*  
By Mrs. Kennard.

The Institute will be open from 10.30 a.m. to 4 p.m. throughout the week when visitors will be welcomed, though special demonstrations will not be available except as above. No ticket is required for a casual visit.

**Demonstration of Exhibition of Radiotherapy in Ophthalmology (Wellcome Research Institution)**

Dr. M. Lederman.

The Exhibition is largely devoted to the technical methods of the radiotherapy of both malignant and non-malignant diseases of the eye. Various devices for protecting the eye are shown. Conditions suitable for treatment are illustrated by photographs and some results of treatment are given.

**Physiotherapy Demonstration (Moorfields, City Road)**

Dr. P. D. Trevor-Roper.

A description of the Physiotherapeutic methods now employed at Moorfields—Actino-therapy (ultra-violet and infra-red irradiation), low voltage electrotherapy (Ionisation, Galvanism and Electrolysis) and high-voltage electrotherapy (short-wave diathermy); with a demonstration of the instruments in use. Their therapeutic indications in ophthalmology will be discussed with an analysis of the cases recently treated and a commentary on the results of the various treatments.

**Demonstration of the Application of Colour Television to Ophthalmology**

Mr. Harold Ridley.

A demonstration of the application of colour television to ophthalmology, including ophthalmoscopy, will be given at St. Thomas's Hospital, S.E.1, at the following times:—

Tuesday, July 18th, 11 a.m.—12.30 p.m.

Wednesday, July 19th, 2.30 p.m.—4 p.m.

Thursday, July 20th, 2.30 p.m.—4 p.m.

Friday, July 21st, 11 a.m.—12.30 p.m.

### **Orthoptic Demonstrations**

Orthoptic demonstrations are being held concurrently at the branches of Moorfields, Westminster and Central Eye Hospital—Moorfields Branch, City Road, E.C.1, and the Westminster Branch, High Holborn, W.C.1—in accordance with the time table set out below. These will be given by senior Orthoptists of the United Kingdom and will cover all aspects of modern orthoptic treatment of strabismus and heterophoria. Typical cases in each category will be demonstrated. Visitors will be personally escorted round the clinics in order that all points of interest may be explained and discussed in detail.

### **Programme**

<b>Moorfields Branch</b>	<b>Westminster Branch</b>
--------------------------	---------------------------

**Tuesday, July 18th**

Occlusion. Heterophoria.	Divergent strabismus
	Paralytic strabismus

**Wednesday, July 19th**

Convergent strabismus	Occlusion
Contact lens cases	Heterophoria

**Thursday, July 20th**

Divergent strabismus	Convergent strabismus
Paralytic strabismus	

### **Demonstration of Artificial Eye Manufacture and Fitting (London School of Hygiene)**

The manner and methods of making artificial eyes, whether in the older medium of glass or the newer of plastic material (which came into being in 1942), are always of interest to surgeons, and members of the Association of Dispensing Opticians have been invited to give demonstrations of both.

It will be shown how amenable acrylic material is to the production of unusual shapes to suit disfigured or abnormal orbits, and to the provision of extremely thin contact shells to fit over shrunken eyes, and also how the employment of acrylic substances facilitates the alteration of the artificial eye during actual fitting.

It is hoped that several patients actually wearing the various types of artificial eyes will be in attendance, including some wearing or being fitted with the latest "Mobileye," a lifelike prosthesis used in conjunction with the Hamblin-Cutler implant successfully employed by many ophthalmic surgeons recently. An artist will be painting the irides to match patients' existing eyes prior to their incorporation in the finished artificial eye.

The use of glass in making artificial eyes is perhaps the more spectacular method of producing these prostheses, since it depends to a much larger degree on the manipulative skill of the actual individual eye maker. Opportunity is offered for comparing the methods.

**Methods of Manufacture and Fitting of Contact Lenses  
(London School of Hygiene)**

The indications for Contact Lenses may be diagnostic, operative, protective, preventive, therapeutic or optical. For most irregular astigmatisms such as those due to conical cornea, corneal degenerations or scars following mechanical, chemical or infective lesions, as well as for higher refractive errors (uniocular aphakia, extreme myopia and the like), there is no substitute for contact lenses. The majority of lenses however are prescribed for patients who on account of common errors of refraction are dependent on the constant use of glasses and who for professional or other reasons are anxious to wear contact lenses.

Tolerance varies from 8 to 16 hours per day. Maximum tolerance is obtained by systematic fitting. Sources of chemical irritation due to stagnation of the precorneal chamber are dealt with—mostly by means of a perforation—as carefully as are the causes of mechanical irritation due to maladjustment.

**DEMONSTRATIONS**

Demander au Bureau les cartes d'admission pour toutes les démonstrations.

**L'Institut d'Ophtalmologie**

L'Institut d'Ophtalmologie, Judd Street, W.C.1 (à 500 mètres au sud de l'Exposition Industrielle, St. Pancras Town Hall) constitue l'école post-graduée d'enseignement et de recherche de l'Université de Londres, et qui est affiliée aux Hôpitaux de Moorfields, Westminster et Central Eye.

Dans l'après-midi de mercredi le 19 juillet, l'Institut sera ouvert de 14.30 à 16.30 heures quand on pourra visiter toutes les sections—pathologie, tableaux médicaux, physiologie, chimie, etc.

Les démonstrations suivantes ont été arrangées à partir de 14.30 heures, pour lesquelles on peut obtenir les billets au Bureau à la British Medical Association House. Puisqu'un grand nombre de personnes ne pourraient bien voir ces démonstrations à leur satisfaction, l'entrée aux démonstrations ne sera que par carte.

1. La mensuration de la vitesse de l'écoulement de l'humeur aqueuse. L'injection d'isotopes radio-actifs à la chambre antérieure et leur estimation subséquente.  
par D. M. Maurice.
2. Etudes de la pression intra-oculaire.  
Les effets de nitro-gomme et de la stimulation

sympathique.  
par H. Davson, E. S. Perkins, et D. P. Greaves.

3. Hyaluronidase étendant réaction.  
par A. M. Woodin.

4. Technique pour la collection et estimation des larmes humaines.  
par A. Giardini et J. R. E. Roberts.

5. Mensuration de l'épaisseur de la cornée.  
par D. M. Maurice et A. Giardini.

6. Quelques expériences de la physiologie du fovea.  
Une méthode pour obtenir augmentation apparemment de la sensibilité d'une émulsion photographique.  
par Professeur H. Hartridge, F.R.S.

7. Demonstration de l'électro-physiologie de la rétine.  
par L. C. Thomson.

8. Spectrum d'absorption de pigments visuels.  
par H. J. A. Dartnall.

9. Expériences subjectives de la vision.  
par R. A. Weale.

10. Demonstration de phénomènes de la polarisation de bâtonnets de la rétine.  
par Mme. Kennard.

L'Institut sera ouvert tous les jours de 10.30 à 16 heures, les visiteurs y sont cordialement invités, mais les démonstrations n'auront lieu qu'aux dates indiquées ci-dessus. Aucune carte d'entrée n'est exigée pour une visite informale.

**Démonstration de l'Exposition de Radiothérapie dans l'Ophthalmologie (Wellcome Research Institution)**

Dr. M. Lederman.

Cette exposition est dévouée presqu'entièrement aux méthodes techniques de la radiothérapie de maladies malignes et non-malignes de l'oeil. Plusieurs méthodes pour protéger l'oeil sont montrées. Les conditions appropriées au traitement sont illustrées par des photographies, et quelques résultats de ce traitement sont donnés.

**Démonstration de Physiothérapie (Moorfields, City Road)**

Dr. P. D. Trevor-Roper.

Démonstration des méthodes de physiothérapeutique actuellement employées à Moorfields—Actinothérapie (Rayons ultra-violets et infra-rouges). Electrothérapie à bas voltage (diathermie à ondes courtes) avec démonstration des instruments employés. Leurs indications thérapeutiques en ophtalmologie sont l'objet d'une discussion avec analyse des cas récemment traités et suivie d'un commentaire sur les résultats des traitements divers.

**Démonstration de l'Application de la Télévision en couleur l'Ophthalmologie**

Mr. Harold Ridley.

Une démonstration de l'application de la télévision en

couleur à l'Ophtalmologie, y compris l'Ophtalmoscopie, sera faite à l'Hôpital St. Thomas, S.E.1, aux dates et heures suivantes :

Mardi 18 Juillet	11.00 — 12.30 heures
Mercredi 19 Juillet	14.30 — 16.00 heures
Jeudi 20 Juillet	14.30 — 16.00 heures
Vendredi 21 Juillet	11.00 — 12.30 heures

**Demonstrations Orthoptiques**

Des démonstrations orthoptiques auront lieu concurremment aux hôpitaux Moorfields (a City Road, E.C.1), et Westminster (a High Holborn, W.C.1) selon l'indicateur ci dessous. Elles seront faites par les Orthoptistes principaux de Grande Bretagne, et comprendront tous les aspects de traitement orthoptique moderne de strabisme et hétérophoria. Il y aura des cas typiques en chaque catégorie. Messieurs les visiteurs seront accompagnés autour des cliniques pour que toutes les questions puissent être expliquées et discutées en détail.

**Programme**

Succursale de l'Hôpital Moorfields	Succursale de l'Hôpital Westminster
------------------------------------	-------------------------------------

**Mardi le 18 Juillet**

Occlusion. Hétérophoria	Strabisme divergent
	Strabisme paralytique

**Mercredi le 19 Juillet**

Strabisme convergent	Occlusion
Cas de verres de contact	Hétérophoria

**Jeudi le 20 Juillet**

Strabisme divergent	Strabisme convergent
Strabisme paralytique	

**Demonstration de la Manufacture et de l'Ajustement des Yeux Artificiels (London School of Hygiene)**

La façon et la méthode de la manufacture des yeux artificiels, soit en verre soit en matériel plastique (qui apparut en 1942), sont toujours intéressantes aux chirurgiens, et les Membres de l'Association des Opticiens dispensaires ont été invités à donner des démonstrations de toutes les deux.

On verra combien le matériel acrylique se prête à la production de formes peu communes pour s'adapter aux orbites et déformées et anormales et à la production de verres de contact extrêmement minces pour mettre par dessus les yeux rétrécis. On verra aussi combien l'emploi de ces substances facilite la correction de l'œil artificiel pendant l'ajustement actuel.

On espère que plusieurs patients portant de différents types d'yeux artificiels y compris le "Mobileye" se présenteront. Ce "Mobileye," une prothèse d'après nature porté avec le Hamblin-Cutler Implant a été ordonné dernièrement avec beaucoup de succès par plusieurs chirurgiens ophtalmiques. Un artiste sera en train de peindre les iris pour

apparier les yeux actuels des patients avant de les incorporer dans l'oeil artificiel.

L'emploi de verre pour les yeux artificiels est peut-être une méthode plus frappante pour produire ces prostheses puisqu'il dépend à un degré beaucoup plus grand de la dexterité manipulative du fabricant. On aura l'occasion de comparer ces méthodes.

***Méthodes de la manufacture et de l'adaptation de verres de contact (London School of Hygiene)***

Les indications pour verres de contact peuvent être diagnostiques, opératoires, protectrices, préventives, thérapeutiques ou optiques. Pour les astigmatismes irrégulières telles que celles dues à une cornée cornique, dégénération de la cornée ou aux cicatrices suivant les lésions mécaniques, chimiques ou contagieuses, ainsi que pour les erreurs plus sérieuses (aphakie unioulaire, myopie extrême, etc.) il n'y a pas de remplaçant pour les verres de contact. La plupart des verres sont ordonnées pour les patients qui, à cause d'erreurs ordinaires de réfraction dépendent de l'usage continual de lunettes, et qui, pour des raisons, professionnelles ou autres, désirent porter les verres de contact. Tolérance est de 8 à 16 heures par jour. Tolérance maximum est obtenue par l'ajustement systématique. Les causes d'irritation chimique due à la stagnation dans la chambre antérieure sont améliorées—principalement par moyen d'une perforation—aussi soigneusement que sont les causes d'irritation mécanique dues au malajustement.

**DEMOSTRACIONES**

Los billetes para asistir a estos actos, deberán recogerse en las oficinas.

***Instituto de Oftalmología***

El Institute of Ophthalmology, sito en Judd Street, London, W.C. 1 (a 500 metros al sur de la Exposición Comercial en el Ayuntamiento de St. Pancras), es la escuela de enseñanza suplementaria y pesquisas de la Universidad de Londres, y está afiliada con los hospitales oftalmológicos de Moorfields, Westminister y Central.

En la tarde de miércoles 19 de julio el Instituto quedará abierto de 14h30 a 16h30 para la visita de todas las secciones-patología, ilustración médica, fisiología, química, etc.

Se han dispuesto las siguientes demostraciones para empezar a 14h, poco más o menos, pudiendo obtenerse los billetes de entrada en la Oficina General en B.M.A. House. Dada la imposibilidad de que una numerosa asistencia pueda ver las demostraciones acomodadamente, no se admitirán a estos demostraciones sino los portadores de billetes.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

1. *Medida de las velocidad de flujo del humor acuoso.*  
La inyección de isótopos radio-activos en la cámara anterior y su evaluación subsiguiente.  
Por D. M. Maurice.
2. *Estudios sobre la tension intra-ocular.*  
Los efectos de la mostarda-nitrógeno y la excitación simpática.  
Por H. Davson, E. S. Perkins y D. P. Greaves.
3. *La reaccion de derrame de Hialuronidase.*  
Por A. M. Woodin.
4. *La Tecnica de la recogida y evaluacion de lagrimas humanas.*  
Por A. Giardini y J. R. E. Roberts.
5. *Medida del espesor de la córnea.*  
Por D. M. Maurice y A. Giardini.
6. *Algunos experimentos sobre la fisiología de la fosa central.*  
*Un metodo de conseguir sensibilidad mayor aparente de una emulsion fotografica.*  
Por Prof. H. Hartridge, F.R.S.
7. *Demostracion de electrofisiologia retiniana.*  
Por L. C. Thomson.
8. *Espectros de absorcion de pigmentos visuales.*  
Por H. J. A. Dartnall.
9. *Experimentos de vision subjetivos.*  
Por R. A. Weale.
10. *Demonstracion del fenomeno de polarización de los bastones retinianos.*  
Por la Sra. Kennard.

El Instituto permanecerá abierto entre las 10.30 a.m. y las 4 p.m. durante toda la semana, para recibir a los visitantes, aunque las demostraciones especiales solamente tendrán lugar en los días y horas anteriormente indicados.

No se requerirá la presentación de billete para las visitas ordinarias.

**Demostración en la Exposición de Radioterapia Oftalmológica (Wellcome Research Institution)**

Dr. M. Lederman.

La exposición es consagrada mayormente a los métodos técnicos de la radioterapia de enfermedades oculares tanto malignas como benignas. Se mostrarán varios dispositivos para la protección de los ojos. Se ilustrarán por medio de fotografías los estados apropiados para el tratamiento, y se indicarán algunos resultados de las curas.

**Demostración de Fisioterapia (Moorfields, City Road)**

Dr. P. D. Trevor Roper.

Descripción de los métodos fisioterapéuticos empleados actualmente en Moorfields—Actinoterapia (radiaciones ultravioleta e infra-roja), electroterapia de baja tensión (diatermia

de onda corta) con demostración de los instrumentos empleados.

Se debatirán sus indicaciones terapéuticas en oftalmología, con análisis de los casos tratados recientemente y comentario acerca de los resultados de los diferentes tratamientos.

***Demostración de las aplicaciones de la televisión en colores a la Oftalmología***

Mr. Harold Ridley.

Una demostración de esta clase, incluyendo oftalmoscopia, será ofrecida en el Hospital de Santo Tomás (St. Thomas's Hospital), en los días y horas siguientes :

Martes 18 de julio : de 11 a.m. a 12.30 p.m.

Miércoles 19 de julio : de 2.30 p.m. a 4 p.m.

Jueves 20 de julio : de 2.30 p.m. a 4 p.m.

Viernes 21 de julio : de 11 a.m. a 12.30 p.m.

***Demostraciones Ortópticas***

Demostraciones ortópticas simultáneas serán organizadas en las surcursales de los hospitales oftálmicos de Moorfields, Westminster y Central a saber, Moorfields, en City Road, E.C. 1 y Westminster en High Holborn, W.C. 1, con arreglo al cuadro que se encuentra más abajo. Estas demostraciones serán presentadas por ortoptistas principales del Reino Unido y abarcarán todos los aspectos del tratamiento ortóptico moderno del estrabismo y la heteroforia. Se demostrarán casos típicos de cada categoría. Los visitantes serán acompañados personalmente por guías al hacer el giro de las clínicas, para que todos los puntos interesantes puedan quedar plenamente aclarados y discutidos.

***Programa***

***Sucursal de Moorfields      Sucursal de Westminster***

***Martes, 18 de Julio***

Oclusión.	Estrabismo divergente.
Heteroforia.	Estrabismo paralítico.

***Miércoles, 19 de Julio***

Estrabismo convergente.	Oclusión.
Casos de lentes de contacto.	Heteroforia.

***Jueves, 20 de Julio***

Estrabismo divergente.	Estrabismo convergente.
Estrabismo paralítico.	

***Demostración de la Fabricación y Colocación de Ojos Artificiales (London School of Hygiene)***

Los procesos y métodos de la fabricación de ojos artificiales, ya sean del tipo de cristal antiguo o del nuevo de material plástico (introducido en 1942), resultan ser de interés constante para los quirúrgicos, motivo por el cual

se invitó a miembros de la Association of Dispensing Opticians a dar demostraciones de ambos aspectos.

Se mostrará lo fácil que resulta el adaptar el material acrílico a la producción de modelos de formas inusitadas para la colocación en órbitas deformadas o anormales, y para colocar revestimientos extremadamente delgados sobre ojos encogidos, así como el empleo de materiales acrílicos facilita las modificaciones de la prótesis en el curso de la colocación.

Se confía en que algunos pacientes dotados de diferentes tipos de ojos artificiales se presenten a la demostración, incluso varios ya provistos o en vías de colocación del último tipo de "Mobil-eye" una prótesis perfectamente natural usada en conjunto con la implantación de Hamblin-Cutler, recientemente ejecutada con éxito por muchos quirúrgos oftálmicos. Un artista pintará el iris antes de su incorporación en la prótesis acabada, para hermanar el otro ojo del paciente.

El empleo del cristal es un método tal vez más curioso de hacer ojos artificiales, ya que el éxito depende mucho más de la habilidad individual del obrero. Se ofrecerá así una ocasión para comparar los dos métodos.

#### **Métodos de fabricación y colocación de lentes de contacto (London School of Hygiene)**

Las indicaciones para lentes de contacto pueden ser de carácter diagnóstico, operatorio, protectivo, profiláctico, terapéutico u óptico. Para la mayoría de los astigmatismos irregulares, como los debidos a conicidad de la córnea, degeneraciones o cicatrices corneales resultantes de lesiones mecánicas, químicas o infectivas, así como para los trastornos más graduados (afaquea unioocular, miopía muy acentuada y otros por el estilo) no hay nada equivalente a los lentes de contacto. Se prescribe, empero, la mayoría de los lentes para pacientes quienes con motivo de trastornos de refracción corrientes necesitan llevar anteojos constantemente, y por su profesión u otras razones prefieren los lentes de contacto.

La tolerancia varía entre 8 y 16 horas diarias, obteniéndose la tolerancia máxima por un asiento sistemático. Se describen las causas de irritación química debida a estagnación de la cámara anterior,—mayormente por medio de una perforación—tan detalladamente como las causas de irritación mecánica debida a maladaptaciones.

## **EXHIBITIONS**

### **(a) Clinico-Pathological**

This exhibition illustrates by photographs, paintings, statistical tables, instruments, and pathological specimens some of the recent developments in ophthalmology. The main

exhibition is in the Museum of the Wellcome Research Institution; the morbid histology section is arranged in the London School of Hygiene and Tropical Medicine.

Recent advances in the fields of ophthalmological photography, glaucoma and the technique of keratoplasty and other surgical procedures are illustrated. The treatment of aniseikonia and ocular muscle imbalance is demonstrated. There are specimens and illustrations of certain unusual diseases of the eye, and a number of exhibits devoted to ocular morphology.

**(b) Historical**

This exhibition includes many instruments of historical interest gathered from collections of the Royal College of Surgeons, the Institute of Ophthalmology, the British Optical Association and from other sources.

Portraits of Thomas Young, Sir William Bowman and Priestley Smith are shown. An item deals with the Eye Hospitals of Dublin.

**(c) Books**

For the period of the Congress and for its members only, there will be exhibited in the Historical Library of the Wellcome Institution a series of literary landmarks in the history of ophthalmology, extending from the *Ebers Papyrus* to the time of Helmholtz. Among the rare works which will be exhibited will be the following:—Variolo, *De nervis opticis* (1573); Scheiner, *Oculus* (1619); Meibom, *De vasis palpebrarum nervis epistola* (1666); Zinn, *De ligamentis ciliaribus* (1753); Benevenuto Grassi, *De oculis . . . Ferrara* (1574), first printed book on ophthalmology; Guy de Chauliac (1500) containing Canamusali's *De oculis* and Jesu Haly's *De oculis*; Bartisch, G., *Ophthalmodouleia, das ist Augendienst* (1583).

**(d) Histological**

This Exhibition comprises a series of histological specimens and micro-photographs demonstrating certain aspects of the anatomy and pathology of the human eye. There are also a number of animal specimens showing aspects of the comparative anatomy of the eye, and a series of sections demonstrating the bacteriology of ocular infections in a region of the United States of America.

**(e) Industrial and Social Ophthalmology**

An Exhibition devoted to the Industrial and Social Aspects of Ophthalmology has been arranged at the London School of Hygiene and Tropical Medicine. One section, referring to the education of employers and workers in the principles of accident prevention, has been arranged jointly by the Royal Society for the Prevention of Accidents (Great Britain), the National Society for the Prevention of Blindness (New York) and the Safety, Health and Welfare Museum (Ministry of Labour,

Great Britain). Other sections illustrate the equipment of an industrial ophthalmic clinic and the treatment of industrial eye injuries, including first aid. Methods of eye protection in industry, the use of optical devices in close work, and the ophthalmic problems in the rayon industry, with special reference to colour vision, are also shown.

Other sections deal with recent research into the problems of miner's nystagmus, including developments in illumination in coal mines, and the welfare, rehabilitation, training and employment of the blind. There is also an exhibition of books on industrial ophthalmology and industrial medicine.

Demonstrations of the manufacture and fitting of artificial eyes and contact lenses are housed in this Exhibition.

**(f) *Exhibition of Illuminating Engineering***

The Lighting Exhibition, which is to be one of the features of the Congress, has been arranged by Mr. H. C. Weston in the Public Health Museum of the London School of Hygiene and Tropical Medicine. The exhibition has been organized by the British Illuminating Engineering Society with the support and assistance of the leading Associations in the lighting industry.

Exhibits have been prepared to illustrate the fundamental principles involved in the design of good natural and artificial lighting in buildings. The variation in the amount of illumination required according to the characteristics, e.g., size and contrast, of the objects principally governing the severity of visual tasks in industry, schools, offices and domestic dwellings is demonstrated; so also is the significance of other conditions of lighting, e.g., the direction, diffusion and spectral quality of the light, as well as the light-distribution throughout the environment, in relation to the comfort, visual hygiene and occupational efficiency of room occupants.

Portable instruments for the measurement of illumination and brightness are exhibited, and a special feature of the exhibition is a demonstration of the operation and characteristics of fluorescent lamps. There are exhibits of scientifically designed lighting equipment; and the use, in practice, of selected lighting units and systems of lighting of wide applicability is exemplified in suitable rooms. Special lamps and equipment useful in ophthalmic practice and research (e.g., high intensity flash lamps for photography of the eye, and operating lamps) are shown. Other exhibits show the combination of optical aids with suitable lighting for "fine" work in industry and elsewhere, the lighting of test-charts, and the environmental application of colour and its effect upon the utilization of light and the achievement of satisfactory brightness gradients within the general visual field. In addition, there are exhibits dealing with British mandatory lighting

requirements, e.g., in factories, schools and mines, with, it is hoped, an exhibition of modern mains lighting at the coal face. There are also explanatory exhibits dealing with the recommendations for good lighting practice which are incorporated in recent codes issued by authoritative bodies.

**(g) Scientific and Trade Exhibition**

The Exhibition of modern Ophthalmic and Surgical Instruments, Ancillary Equipment, Drugs and Books is in the Assembly Room, St. Pancras Town Hall. It is open from 2.30 p.m. to 6 p.m. on Monday, July 17th, and from 9 a.m. to 6 p.m. on each subsequent day including Saturday, July 22nd, and is fully described in the Exhibition Catalogue.

The Exhibition demonstrates every aspect of modern ophthalmic instrument manufacture in this country; there are some forty stands in all including those of 7 foreign exhibitors. Professional interpreters are in attendance. Members are reminded that orders may be booked with any of the Exhibitors.

The Exhibition will be officially opened on Monday, 17th July, at 2.30 p.m. by His Worship the Mayor of St. Pancras.

**EXPOSITIONS**

**(a) Clinico-pathologique**

Cette exposition fait voir au moyen des photographies, des peintures et des tables statistiques, des instruments et des spécimens pathologiques quelques uns des développements récents en l'ophtalmologie. L'exposition principale se trouve au Musée de la Wellcome Research Institution ; la section d'histologie pathologique est présentée au London School of Hygiene and Tropical Medicine.

Les avances plus récentes en photographie ophtalmologique, glaucome et la technique de kératoplastie et d'autres procédés chirurgiques sont démontrés. Le traitement de l'aniseikonie et du déséquilibre des muscles oculaires est montré. Il y a des spécimens et des illustrations de certaines maladies exceptionnelles de l'oeil, et plusieurs des objets exposés sont dévoués à la morphologie oculaire.

**(b) Historique**

Cette exposition comprend plusieurs instruments d'un intérêt historique, provenant des collections du Royal College of Surgeons, du Institute of Ophthalmology, du British Optical Association et d'autres sources.

On y verra les portraits de Thomas Young, de Sir William Bowman et de Priestley Smith et une information concernant les hôpitaux pour les Yeux de Dublin.

**(c) Livres**

Pendant la durée du Congrès et pour les délégués seulement se trouvera dans le Historical Library de la Wellcome Research Institution une série de signes littéraires dans

l'histoire d'ophtalmologie dès l'âge du *Ebers Papirus* jusqu'au siècle de Helmholtz. Parmi les œuvres exposées seront les suivantes :—Variolo, *De nervis opticis* (1573) ; Scheiner, *Oculus* (1619) ; Meibom, *De vasis palpebrarum novis epistola* (1666) ; Zinn, *De ligamentis ciliaribus* (1753) ; Benevenuto Grassi, *De Oculis* . . Ferrara (1574), la première œuvre sur l'ophtalmologie à être imprimée ; Guy de Chauliac (1500) comprimant *De Oculis* de Canamusali et *De Oculis* de Jesu Haly ; Bartisch, G., *Ophthalmodouleia, das ist Augendienst* (1583).

**(d) Histologique**

Cette exposition contient une série de spécimens histologiques et des micro-photographies qui montrent certains aspects de l'anatomie et la pathologie de l'œil humain. Il y a aussi quelques modèles d'animaux qui montrent les aspects de l'anatomie comparative de l'œil, et une série de sections faisant voir la bactériologie des infections oculaires dans une région des Etats-Unis.

**(e) L'Ophthalmologie industrielle et sociale**

Une exposition dévouée aux aspects industriel et social d'Ophthalmologie se trouve au London School of Hygiene and Tropical Medicine. Une partie qui s'occupe de l'enseignement des chefs et des ouvriers des principes de la prévention d'accidents a été arrangée conjointement par la Royal Society for the Prevention of Accidents (Grande Bretagne), la National Society for the Prevention of Blindness (New York), et le Safety, Health and Welfare Museum (Ministère de Travail, Grande Bretagne). D'autres sections montrent l'équipement d'une clinique ophtalmique industrielle et le traitement de blessures souffrées dans l'industrie comprenant le secours aux blessures. On verra aussi les méthodes pour protéger l'œil dans l'industrie, l'emploi des aides optiques pour le travail soigné, et les problèmes ophtalmiques qui se présentent dans la production de rayon avec référence spéciale aux couleurs, sont témoignés.

D'autres sections s'occupent de la recherche des problèmes du nystagmus des mineurs compris les développements d'éclairage des mines, et le bien être, la réhabilitation, l'instruction et l'emploi des aveugles. Il y a aussi une exposition de livres qui s'occupent de l'ophtalmologie et de la médecine industrielle.

Les démonstrations de la manufacture et de l'ajustement des yeux artificiels et des verres de contact se trouvent également dans cette exposition.

**(f) Exposition d'éclairage ingénieur**

L'exposition d'éclairage qui est une des particularités du Congrès, a été disposée par Mr. H. C. Weston, au Public Health Museum du London School of Hygiene and Tropical

Medicine. Elle est organisée par la British Illuminating Engineering Society avec le concours et l'assistance des Associations principales de l'Industrie d'Eclairage.

On a arrangé des objets, destinés à illustrer les principes fondamentaux du dessin du bon éclairage naturel et artificiel dans les bâtiments. La variation de la quantité d'illumination nécessaire selon les caractéristiques—par exemple, le volume et contraste des objets déterminant la sévérité des tâches dans l'industrie, l'école, le bureau et la maison—est témoignée ; ainsi que la signification d'autres conditions d'éclairage, par exemple, la direction, diffusion et qualité spectrale de la lumière, et la distribution de lumière à l'égard du confort, hygiène visuelle et efficacité des occupants d'une pièce.

Des instruments portatifs pour mesurer l'illumination et la clarté sont exposés, et une spécialité de l'exposition est une démonstration de l'opération et les caractéristiques des lampes fluorescents. Il y a des appareils d'éclairage construits suivant les desseins scientifiques ; ainsi que l'exercice des unités spéciales d'éclairage et des systèmes d'illumination d'une grande applicabilité dans des pièces appropriées. Des lampes et appareil spéciaux employés dans l'exercice et la recherche de l'ophtalmologie (par exemple les lampes à grande intensité lumineuse pour la photographie de l'oeil et les lampes pour opérer) sont exposés.

D'autres objets démontrent la combinaison d'aides optiques et de l'éclairage pratique pour travail soigné dans l'industrie et autre part, l'éclairage des cartes et l'application à l'environnement de couleur et son effet sur l'utilisation de lumière et la production de degrés de clarté dans le champ de vision générale. En outre il y a des objets témoignant à l'éclairage se conformant aux conditions mandatoires britanniques—par exemple, dans les usines, écoles et mines—ainsi qu'une exposition d'illumination moderne aux mines. Il y a aussi des objets explanatory des recommandations pour le bon éclairage qui sont incluses dans des codes récents publiés par des Corps publics.

**(g) Exposition Scientifique et Commerciale**

L'exposition d'instruments chirurgiques et ophtalmiques modernes, appareil accessoire, drogues et livres se trouve dans l'Assembly Room, St. Pancras Town Hall. Elle restera ouverte de 14.30 à 18.00 heures lundi, le 17 juillet, et de 09.00 à 18.00 heures tous les autres jours de la semaine, samedi le 22 juillet y compris. Tous détails seront trouvés dans le Catalogue de l'Exposition.

Cette exposition montre tous les aspects de la manufacture dans ce pays des instruments ophtalmiques modernes ; il y a en tout environ de 40 étalages y compris, 7 des exposants étrangers.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

Il y a des interprètes professionnels. Les visiteurs sont priés de noter qu'ils pourront placer ses commandes avec n'importe lequel des exposants.

Cette exposition sera inaugurée lundi, le 17 juillet à 14.30 par M. le Maire de St. Pancras.

## EXPOSICIONES

### (a) *Clinico-Patológica*

Esta exposición demuestra algunos de los recientes desarrollos oftalmológicos mediante fotografías, pinturas, cuadros estadísticos, instrumentos y especímenes patológicos.

La exposición principal se encuentra en la Wellcome Research Institution; la sección de histología patológica está organizada en la London School of Hygiene and Tropical Medicine.

Se demuestran los recientes adelantos en los campos de fotografía oftalmológica, así como la técnica de la queratoplastia y de otras intervenciones quirúrgicas, el tratamiento de anisocoria y anisometropía. Se exhiben especímenes y ilustraciones de ciertas enfermedades oculares raras y de morfología ocular.

### (b) *Histórica*

En esta exposición figurarán muchos objetos de valor histórico escogidos de entre las colecciones del Royal College of Surgeons, The Institute of Ophthalmology, The British Optical Association, y otras procedencias. Se exhibirán los retratos de Thomas Young, Sir William Bowman y Priestley Smith. Los Hospitales Oftalmológicos en Dublin estarán especialmente representados.

### (c) *Libros*

Durante el Congreso y para sus socios exclusivamente, quedará expuesto en la Biblioteca Histórica de la Wellcome Research Institution, una serie de obras que hicieron época literaria en la historia de la oftalmología, desde el *papiro de Ebers* hasta el tiempo de Helmholz. Las raras obras exhibidas comprenderán, entre otros: Varioolo, *De nervis opticis* (1573); Scheiner, *Oculus* (1619); Mcibom, *De vases palpebrarum novis epistola* (1666); Zinn, *De ligamentis ciliaribus* (1753); Benvenuto Grassi, *De oculis . . . Ferrara* (1574) el primer tratado de oftalmología impreso; Guy de Chauliac (1500) que contiene *De oculis* por Canamusali y *De oculis* por Jesú Haly; Bartisch, G., *Ophthalmodouleia, das ist Augendienst* (1583).

### (d) *Histológica*

Esta exhibición comprende una serie de especímenes y micro-fotografías histológicas que demuestran ciertos

aspectos de la anatomía y patología del ojo humano. Además, hay varios especímenes animales que muestran varios aspectos de la anatomía ocular comparativa, así como una serie de cortes para estudiar la bacteriología de las infecciones oculares en una región de los Estados Unidos de Norte-América.

**(e) *Oftalmología Industrial y Social***

Ha sido organizado una Exposición consagrada a los aspectos Industrial y Social de Oftalmología, en la London School of Hygiene and Tropical Medicine. Una sección que trata de la enseñanza a los patrones y obreros de los principios de la prevención de accidentes, ha sido organizada por la Royal Society for the Prevention of Accidents (Great Britain) en conjunto con la National Society for the Prevention of Blindness.

(Neuva York) y el Safety, Health and Welfare Museum (Ministerio del Trabajo (Gran Bretaña). Otras secciones demuestran el equipamiento de una Clínica Oftálmica Industrial y el tratamiento de heridas oculares industriales, incluso los primeros socorros. Además, se presentan métodos de protección de los ojos en las industrias, el empleo de dispositivos ópticos para el trabajo muy de cerca, así como los problemas oftalmológicas en la industria del rayón, con referencia especial a la visión cromática.

Otras secciones tratan de las recientes pesquisas sobre el nistagmo de los mineros, incluso adelantos en el alumbrado de minas hulleras, y la salud, rehabilitación, enseñanza y ocupación de los ciegos. También hay una exposición de libros sobre oftalmología industrial y medicina industrial.

Muestras de la fabricación y colocación de ojos artificiales y de lentes de contacto se encuentra también en esta Exposición.

**(f) *Ingeniería del Alumbrado***

La Exposición del Alumbrado que ha de ser una de las atracciones del Congreso, quedará alojada por el Sr. H. C. Weston en el Public Health Museum de la London School of Hygiene and Tropical Medicine. La exposición está en vías de organización por la British Illuminating Engineering Society con el apoyo y auxilio de las principales asociaciones de la industria del alumbrado.

Los objetos a exponerse serán escogidos para ilustrar los principios fundamentales que rigen las buenas instalaciones de alumbrado natural y artificial de edificios. Se demuestran las variaciones de iluminación precisas segundo las características, como tamaño y contraste, de los objetos de que depende la severidad de las tareas de visión en las fábricas, escuelas, oficinas y viviendas, así como se demostrará la importancia de otros pormenores del alumbrado, tales como la dirección, difusión y calidad espectral de la luz, a más de la repartición de la luz por todo el ambiente.

para asegurar la comodidad, higiene visual y eficacia de trabajo de los moradores.

Se exhibirán instrumentos portátiles para medir la iluminación y claridad, y habrá una sección especial de la exposición para demostrar el funcionamiento y características de las lámparas fluorescentes. Además, se exhibirán instalaciones de alumbrado proyectadas con arreglo a normas científicas; así como otros objetos para ilustrar, en apartados apropiados, el empleo práctico de grupos de alumbrado seleccionados y sistemas de alumbrado de aplicabilidad general. Se mostrarán lámparas especiales y accesorios de utilidad para la práctica y investigación oftálmicas (tales como lámparas de destellos de alta intensidad para fotografía ocular y lámparas para operaciones), así como combinaciones de accesorios de óptica con alumbrado apropiado para trabajos "de precisión" en las fábricas y en otras partes, la iluminación de los cuadros de ensayos, la adaptación cromática al ambiente y su influjo sobre la utilización de la luz y obtención de graduaciones de claridad apropiadas dentro del campo visual general. Además, se exhibirán objetos relacionados con los reglamentos británicos que rigen el alumbrado de fábricas, escuelas y minas, así como, de ser posible, instalaciones de alumbrado eléctrico modernas para la frente de trabajo en las hulleras, y grupos explanatorios para aclarar las normas de buen alumbrado recomendadas en los códigos que algunas asociaciones competentes acaban de publicar.

(g) **Comercio**

La exposición de instrumental oftálmico y quirúrgico moderno, material complementario, productos farmacéuticos y libros, está establecida en el salón de reuniones del Ayuntamiento de St. Pancras. Permanecerá abierta desde las 2.30 p.m. a las 6.00 p.m. el lunes 17 de julio, y desde las 9.00 a.m. a las 6.00 p.m. en los días sucesivos, incluyendo el sábado 22 de julio, y se ofrece la descripción completa en el catálogo de la exposición.

En la exposición se contienen todos los aspectos de los modernos instrumentos oftálmicos elaborados en la Gran Bretaña. Figuran en la misma unos cuarenta "stands" en total, incluyendo los correspondientes a 7 expositores extranjeros. Funcionará un servicio de intérpretes. Se recuerda a los miembros que pueden formular peticiones a cualquiera de los expositores.

La apertura oficial de la exposición, por el Excmo. Sr. Alcalde de St. Pancras, tendrá lugar el 17 de julio a las 2.30 p.m.

**ASSOCIATE EXHIBITION**  
**London Conference on Optical Instruments**

In connection with the above Conference, held concurrently with meetings of the International Optical Commission, the

British Scientific Research Association is arranging an exhibition of British Optical Instruments. This will be held in the Large Physics Laboratory on the Ground Floor of the Physics Department at Imperial College, Imperial Institute Road, South Kensington, on Thursday and Friday, July 20th and 21st from 10 a.m. to 1 p.m. and from 2 p.m. to 5.30 p.m.

Special emphasis will be given to some of the recent developments which will be discussed at the meetings of the Conference, including reflecting microscopes, phase-contrast microscope, spectrophotometers, photographic lenses, etc.

Members of the 16th International Congress of Ophthalmology are welcome to visit the exhibition without charge if wearing the Congress badge.

### **EXPOSITION ASSOCIEE**

#### ***Conférence de Londres sur les Instruments optiques***

La British Scientific Research Association a préparé une exposition d'instruments optiques britanniques ayant rapport à la Conference ci-dessus, et qui aura lieu en même temps que les Réunions de la Commission Internationale Optique. Cette exposition se trouvera au Large Physics Laboratory au rez-de-chaussee du Physics Department à l'Imperial College, Imperial Institute Road, South Kensington, jeudi et vendredi le 20 et 21 juillet de 10.00 à 13.00 heures et de 14.00 à 17.30 heures. Attention spéciale sera accordée à quelques uns des développements récents qui seront discutés pendant les Réunions de la Conférence comprimant les ultra-microscopes, spectrophotomètres, lentilles photographiques, etc.

Messieurs les délégués du 16ième Congrès International d'Ophthalmologie sont invités à visiter l'exposition gratuitement s'ils portent la plaque du Congrès.

### **EXPOSICION ASOCIADA**

#### ***Conferencia en Londres sobre Instrumentos de Optica***

En conjunto con la susodicha conferencia que será organizada simultáneamente con las reuniones de la Comisión Optica Internacional, la British Scientific Research Association está disponiendo una exposición de instrumentos de óptica británicos. Esta exposición estará abierta en el grande laboratorio de física, en el piso bajo del departamento de física del Imperial College, Imperial Institute Road, South Kensington, London, S.W. 7, el jueves y viernes, 20 y 21 de julio, de 10h a 13h, y de 14h a 17h30.

Merecerán especial atención algunos de los recientes desarrollos que serán objeto de discusiones a las reuniones de la Conferencia, incluso microscopios de reflexión, microscopios de fases opuestas, espectrofotómetros, lentes fotográficos, etc.

Los socios del XVI. Congreso de Oftalmología Internacional tendrán derecho a visitar la exposición sin entrada con tal que lleven la insignia del Congreso.

#### **INTERNATIONAL ASSOCIATION FOR THE PREVENTION OF BLINDNESS**

The meeting of the Executive Committee of the International Association for the Prevention of Blindness will take place in the Secretary-General's office on Tuesday, July 18th, at 4.30 p.m.

##### **Agenda**

1. Administrative Report by the President.
2. Financial Report by the Treasurer.
3. Proposals in view of the meeting of the General Assembly.
4. Award of the prize of the International Association for the Prevention of Blindness.

The General Assembly of the Association will be held in Hall C on Wednesday, July 19th at 3 p.m.

##### **Scientific Session**

"Nomenclature and classification of the Causes of Blindness." Opening reports by ;—

138. Prof. Arnold Sorsby: Europe and British Empire.
139. Dr. Conrad Berens: North and South America.
140. Dr. Toulant: France and French Colonial Empire.
141. Dr. Bruce Hamilton: Australia.

Discussion.

142. Dr. S. K. Wentworth and Dr. K. Cunningham: "Prevention of Blindness in the Union of South Africa." Resolution in view of the adoption of an international scheme of classification.

Reports from National Committees for the Prevention of Blindness.

##### **Administrative Session**

1. The President's report.
2. Election of the Members of the staff and Executive Committee of the Association.

#### **L'ASSOCIATION INTERNATIONALE DE PROPHYLAXIE DE LA CECITE**

La Réunion du Comité Exécutif de l'Association Internationale de Prophylaxie de la Cécité aura lieu au Bureau du Secrétaire Général le mardi le 18 juillet à 16.30 heures.

##### **AGENDA**

1. Rapport administratif par M. le Président.

2. Rapport financier par M. le Trésorier.
3. Propositions à l'égard de la Réunion de l'Assemblée Générale.
4. Don du prix de l'Association Internationale de Prophylaxie de la Cécité.

L'Assemblée Générale de l'Association aura lieu dans Salle C le mercredi le 19 juillet à 15.00 heures.

#### **Session Scientifique**

“ La nomenclature et la classification des causes de la cécité.”

Premier rapport par :—

Professeur Arnold Sorsby. Europe et l'Empire britannique.

Dr. Conrad Berens. Amérique du nord et du sud.

Dr. Toulant. France et l'Empire coloniale française.

Dr. Bruce Hamilton. Australie.

Discussion.

Dr. S. K. Wentworth et Dr. K. Cunningham. “ Prophylaxie de la cécité en l'Union de Sud Afrique.”

Résolution à l'égard de l'adoption d'un plan international de classification.

Rapports des Comités Nationaux de Prophylaxie de la Cécité.

#### **Session Administrative**

1. Le Rapport de M. le Président.
2. L'élection des Membres du personnel et le Comité Exécutif de l'Association.

### **ASOCIACION INTERNACIONAL PARA LA PREVENCION DE LA CEGUERA**

La reunión de la Junta Executiva de la Asociación Internacional para la Prevención de la Ceguera se celebrará en la oficina del Secretario General el jueves, 18 de julio, a 16h30.

#### *AGENDA.*

1. Relación administrativa presidencial.
2. Relación financiera del tesorero.
3. Propuestas para la reunión en Asamblea General.
4. Adjudicación del premio de la Asociación Internacional para la Prevención de la Ceguera.

La Asamblea General de la Asociación se reunirá en Hall C el Miércoles, 19 de julio a 15h00.

#### **Sesion Científica**

“ Nomenclatura y Clasificación de las Causas de la Ceguera.” Relación inaugural por los Señores :

Prof. Arnold Sorsby : Europa y el Imperio Británico.

Dr. Conrad Berens : Las dos Américas.

Dr. Toulant : Francia y el Imperio Colonial Francés.

Dr. Bruce Hamilton : Australia.

**Discussion**

Dr. S. K. Wentworth y Dr. K. Cunningham 'La prevención de la ceguera en la Unión del Africa del Sud.'

Resolución tendente a la adopción de un proyecto de clasificación internacional.

Relaciones de las Comisiones Nacionales para la Prevención de la Ceguera.

**Sesión Administrativa**

1. Relación Presidencial.
2. Elección del Personal y de la Junta Executiva de la Asociación.

**INTERNATIONAL ORGANIZATION AGAINST TRACHOMA**

A meeting of the Council (Executive Committee) will be held in University College on Wednesday, July 19th, at 10 a.m., and will be followed by a General Meeting at 10.45 a.m.

The Scientific Meeting of the Organization will be held in Hall B on Wednesday, July 19th, at 2 p.m.

**Programme**

*143.* Opening Address by the President, Mr. A. F. MacCallan, C.B.E., and introduction to a discussion on "The initial signs of trachoma."

*144.* Dr. Jean Sédan (France) : "Recherches et reflexions sur la sensibilité de la cornée trachomateuse."

*145.* Professor C. Pascheff (Bulgaria) : "Further researches on folliculoma."

*146.* Dr. Maxwell Lyons (Egypt) : "The criteria of cure in therapeutic research in trachoma."

*147.* Professor G. Chams (Iran) : "Le résultat d'électrocoagulation."

*148.* Dr. V. Tabone (Malta) : "Aureomycin in trachoma."

*149.* Dr. I. Stankovic and Dr. L. Mandic (Yugoslavia) : "La lutte contre le trachome en Serbie."

*150.* Dr. Alson E. Braley (U.S.A.) : "Treatment of trachoma with aureomycin."

*151.* Professor Y. Ito (Japan) : "The elimination of trachoma."

**ORGANISATION INTERNATIONALE CONTRE LE TRACHOME**

Une réunion du Conseil (le Comité exécutif) aura lieu à l'University College le mercredi le 19 juillet à 10.00 heures, et

**Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2**

sera suivie d'une Réunion Générale à 10.45 heures.

La Réunion Scientifique de l'Organisation aura lieu à Salle B le mercredi le 19 juillet à 14.00 heures.

**Programme**

Premier discours par le Président Mons. A. F. MacCallan, C.B.E., et l'introduction à une discussion sur "Les premiers signes du Trachome."

Dr. Jean Sédan (France) : "Recherches et réflexions sur la sensibilité de la cornée trachomateuse."

Prof. C. Pascheff (Bulgarie) : "Nouveaux recherches sur le folliculome."

Dr. Maxwell Lyons (Egypte) : "Les criteriums de la "guérison" dans les recherches thérapeutiques sur le trachome."

Professeur G. Chams (Iran) : "Le résultat d'électro-coagulation."

Dr. V. Tabone (Malte) : "L'Aureomycine dans le trachome."

Drs. I. Stankovic et L. Mandic (Yugoslavie) : "La lutte contre le trachome en Serbie."

Dr. Alson E. Braley. (U.S.A.) : "Le traitement du trachome avec auréomycine."

Prof. Y. Ito (Japane) : "L'Elimination du Trachome"

**ORGANIZACION INTERNATIONAL ANTI-TRACOMA**

Una reunión del Consejo (Junta Executiva) se celebrará en University College el Miércoles, 19 de julio a las 10h, a la que seguirá una Reunión General a las 10h45.

La Sesión Científica de la Organización se reunirá en Hall B el Miércoles, 19 de julio a las 14h00.

**Programa**

Discurso inaugural por el Presidente, Sr. A. F. MacCallan, C.B.E., con introducción a la discusión sobre "Los Síntomas iniciales del Tracoma."

Dr. Jean Sédan (Francia) : "Estudios y Reflexiones sobre la Sensibilidad de la Córnea tracomatoso."

Prof. C. Pascheff (Bulgaria) : "Pesquisas ulteriores sobre el Foliculoma."

Dr. Maxwell Lyons (Egipto) : "Los Criterios de Cura en la Pesquisa terapéutica del Tracoma."

Prof. G. Chams (Persia) : "Resultado de la Electro-coagulación."

Dr. V. Tabone (Malta) : "La Aureomicina en Tracoma."

Dr. I. Stankovic y Dr. L. Mandic (Yugoeslavia) : "La Lucha contra el Tracoma en Serbia."

Dr. Alson E. Braley (U.S.A.) : "Tratamiento del Tracoma con Auromicina."

Prof. Y. Ito (Japón) : "L'Eliminaion del Trachom."

**SOCIAL PROGRAMME**

Tickets for all social events will be available in the Registration Office or Bureau. It is essential to apply early for

**Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2**

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

tickets for these events as the numbers are strictly limited.

THE GREAT HALL OF THE BRITISH MEDICAL ASSOCIATION is available as a lounge and social centre where refreshments may also be obtained. THE DANSANT DAILY! FROM 4—6 p.m.

Transport for all excursions leaves from Burton Street at the rear of the British Medical Association House. Coaches will leave at the time stated and members participating in the tours are asked to be punctual.

**Dress**

At all official evening functions during the Congress, evening dress with decorations, or dinner jackets (smoking) will be worn. At the Opening and Closing Ceremonies, the officers of the Congress and the official delegate of each country will wear academic dress.

It is possible that ladies will appreciate a hint of appropriate dress for the various tours and social events—for instance, for the day excursions (apart from the dress shows) it would be advisable to wear flat-heeled, comfortable shoes. It would be inadvisable to wear thin evening shoes for the visit to the Zoo.

**SATURDAY, JULY 15th**

The International Council will be entertained to dinner by the President and Council of the Royal College of Surgeons.

**MONDAY, JULY 17th**

2.30 p.m. Visit to Cadby Hall, Messrs. J. Lyons Catering Factory. Visitors will be entertained to tea. *Coaches leave Burton Street at 2 p.m.* returning about 5 p.m.  
3 p.m. Dress show by Lachasse, 4 Farm Street, W.1. (No transport provided.)  
4 p.m. Reception by the London County Council at County Hall. *Coaches leave Burton Street at 3.30 p.m.*, returning about 6.30 p.m.  
9 p.m. Congress Reception and Dance at Grosvenor House. (No transport provided.)

**TUESDAY, JULY 18th**

9.30 a.m. Sightseeing tours of London.  
10 a.m. Film Show in the Auditorium of the Wellcome Research Institution.

**FILMS FOR ASSOCIATES**

“English Criminal Justice.” How the Law is Administered.  
“The Hawaiian Islands.” Dr. W. J. Holmes.  
“The Mediaeval Monastery.”  
“Western Isles.” (The Story of Harris Tweed.)  
“Coastal Village.”  
“Cathedral City (Canterbury).”

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

10 a.m. Visit to Hampton Court, with lunch at the Mitre Hotel. *Coaches leave Burton Street at 10 a.m.*, returning about 5 p.m.  
10.30 a.m. Visit to Cadby Hall, Messrs. J. Lyons Catering Factory. *Coaches leave Burton Street at 10 a.m.*, returning about 12.30 p.m.  
11.30 a.m. Visit to the House of Commons. Those participating should meet at the St. Stephen's Entrance (Strangers' Entrance) at 11.15 a.m. (No transport provided.)  
11.45 p.m. Visit to House of Lords and Palace of Westminster. (No transport provided.)  
8.30 p.m.—  
10.30 p.m. Reception by His Majesty's Government at the Tate Gallery. *Coaches leave Burton Street at 8 p.m. onwards*, returning from 9.30 p.m. onwards.

**WEDNESDAY, JULY 19th**

9.30 a.m. Sightseeing tours of London.  
11.30 a.m. Visit to Westminster Abbey. (No transport provided.)  
11.45 a.m. Visit to House of Lords and Palace of Westminster. (No transport provided.)  
2 p.m. Visit by river launch to the Port of London. Visitors will be entertained to tea. *Coaches leave Burton Street at 1.15 p.m.*, returning 6.30 p.m.  
2 p.m. Visit by river launch to the Royal Naval College and the National Maritime Museum, Greenwich. *Coaches leave Burton Street at 1.30 p.m.*, returning about 6.30 p.m.  
4 p.m. Visit to the Houses of Parliament with tea on the terrace. Those participating should meet at the St. Stephen's Entrance (Strangers' Entrance) at 3.45 p.m. (No transport provided.)  
8.30 p.m.—  
10.30 p.m. Reception by the Royal Society of Medicine with pianoforte recital by Mr. Kendall Taylor. (No transport provided.)  
9 p.m.—  
10.30 p.m. Reception by the Royal College of Surgeons of England. (No transport provided.)  
9 p.m. Reception by the British Medical Association. (No transport provided.)

**THURSDAY, JULY 20th**

9.30 a.m. Sightseeing tours of London.  
10 a.m. Visit to Windsor Castle and Eton College, with lunch at The Old House Hotel, Windsor.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

*Coaches leave Burton Street at 10 a.m., returning about 5 p.m.*

10 a.m. Visit to Windsor Castle and Eton College, with lunch at Great Fosters Hotel, Egham. *Coaches leave Burton Street at 10 a.m., returning about 5 p.m.*

10.15 a.m. Visit to Hatfield House, with lunch at the Old Palace. *Coaches leave Burton Street at 10.15 a.m., returning about 4 p.m.*

11.30 a.m. Visit to the House of Commons. Those participating should meet at the St. Stephen's Entrance (Strangers' Entrance) at 11.15 a.m. (No transport provided.)

11.45 a.m. Visit to the House of Lords and Palace of Westminster. (No transport provided.)

2 p.m. Visit to the Royal Botanic Gardens at Kew, with tea. *Coaches leave Burton Street at 2 p.m., returning about 5.30 p.m.*

7.30 p.m. Official Banquet of the Congress at Grosvenor House, followed by a Dance. (No transport provided.)

**FRIDAY, JULY 21st**

9.30 a.m. Sightseeing tours of London.

11.30 a.m. Visit to Westminster Abbey. (No transport provided.)

11.45 a.m. Visit to the House of Lords and Palace of Westminster. (No transport provided.)

5 p.m. The Hon. Mrs. Williamson-Noble's At-Home and Dress Show by Lachasse at Ridge House, Winnington Road, N.2. (Coaches leave Burton Street at 4.30 p.m., returning about 7 p.m. For the convenience of those concerned the coaches will return past the Zoological Society at about 7 p.m.)

7 p.m.—

10 p.m. Visit to the Zoological Society of London with dinner at 7.30 p.m. *Coaches leave Burton Street at 6.45 p.m., returning to points in the central area from 9.30 p.m. onwards.*

9 p.m. Mrs. Juler's Musical At-Home. (Martin String Quartet.) (No transport provided.)

**POST-CONGRESS**

**SATURDAY, JULY 22nd**

**Visit to Canterbury**

9.15 a.m. Leave Burton Street.

12 noon Arrive Canterbury.

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

12.15 p.m. Lunch at the County Hotel.  
1.15 p.m. Welcome to delegates on behalf of the Dean and Chapter, followed by a conducted tour of the Cathedral and Precincts.  
3.15 p.m. Evensong in the Cathedral, or a short tour of places of interest in Canterbury.  
4 p.m. Leave Canterbury.

**PROGRAMME SOCIAL**

Messieurs les visiteurs peuvent obtenir des billets pour tous les évènements sociaux au Bureau d'Inscription ou au Bureau Général. Il est recommandé de demander les billets d'admission à ces évènements sans tarder, le nombre de places étant limité.

Le Grand Hall du British Medical Association fait fonction de salon et de centre social où l'on peut se restaurer. TOUS LES JOURS DE 16.00 à 18.00 HEURES, THE DANSANT.

Les autocars pour toutes les excursions partiront de Burton Street, derrière British Medical Association House. Ils partiront à l'heure indiquée et Messieurs les visiteurs prenant part aux excursions sont priés d'y être à l'heure exacte.

*Toilette*

A toute soirée officielle habit de soirée avec décosations ou le smoking seront portés. Aux Cérémonies inaugurale et terminale les officiers du Congrès et les Délegués officiels de chaque pays mettront leurs robes académiques.

Cela se peut que les dames apprécieront un avis sur la toilette convenable aux différentes excursions et évènements sociaux — par exemple — pour les excursions de jour (à part les visites aux Salons de Mode) il vaudrait mieux porter des chaussures confortables et à talons bas. Pour la visite au Zoo on est conseillé ne pas mettre de souliers légers de soirée.

#### **HISTORICAL NOTES**

##### **CADBY HALL**

Cadby Hall is the catering factory of Messrs. J. Lyons & Co. Ltd. This firm was founded sixty years ago and has now risen to be the largest catering establishment in the world.

##### **COUNTY HALL**

The headquarters of the London County Council, occupying a prominent site on the south bank of the River Thames adjacent to Westminster Bridge, was completed in 1933. The foundation stone was laid by King George V who also performed the opening ceremony on July 17th, 1922. Extensive damage by bombing was done to the Main Building, North Block, and the colonnade on the river front. The interior decorations in the entrance lobbies and principal rooms display a variety of attractive wood panelling and marble.

##### **HAMPTON COURT AND THE MITRE HOTEL**

Hampton Court was built by Cardinal Wolsey in 1514. The Cardinal's lavish way of living and sumptuous hospitality attracted the attention of Henry VIII, who thereupon moved in himself. While still married to Katherine, the King started to add to the palace a suite of rooms for Anne Boleyn, but Anne had become Queen and been beheaded before her rooms were completed. They were first occupied by Jane Seymour, whose son, Edward VI, was born there.

In close proximity to Hampton Court are buildings erected about 1665 by order of Charles II to house his Courtiers who could not find accommodation in the Palace. These buildings now form the Mitre Hotel, replacing the Toye Inn, which was built in the reign of Henry VIII, and at one time housed the Roundheads of Cromwell. One of the bow windows of

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

the "Toye," containing the original hand-made glass, now forms the front of the Reception Office in the hall of the "Mitre."

#### WESTMINSTER ABBEY

The Abbey of St. Peter is the most celebrated church in the British Empire. In early times, the Thames was bordered by a great expanse of fenland, while near the point where the Abbey stands was a low island known as Thorney islet. Here King Sebert founded the church of St. Peter and a legend relates the coming of St. Peter himself to hallow his new church. In a charter dated 951, King Edgar restored the church, defining the boundary of Westminster. Edward the Confessor started the erection of a new church in 1050 with one central and two western towers and this was continued after his death. In 1245 Henry III started the re-building of the church east of the nave.

The present Abbey is a cruciform structure consisting of a nave with aisles, transepts with aisles and choir with six chapels opening south and north, and an eastern Lady Chapel, known as Henry VII's Chapel. The Chapter House, cloisters and other buildings lie to the south. Wren designed the Western Towers, which were completed in 1740 after his death; Sir Gilbert Scott and John Loughborough Pearson rebuilt the north side.

Within, the Abbey is a fine example of the pointed style, while the choir, with its radiating chapels, follows French examples. Excellent ornamentation is seen in the triforium arcade and between some of the arches of the transept are finely carved figures known as the censing angels.

The choir stalls in the body of the church are modern. The reredos is by Scott with mosaic by Salvietti.

From William the Conqueror onwards every sovereign, except Edward V, has been crowned in the Abbey. The coronation chair in use dates from the time of Edward I and contains beneath its seat the Stone of Scone, on which the Scottish Kings were crowned. A part of the south transept is set aside as "Poet's Corner." The north transept contains monuments to many famous statesmen.

The tomb of Sir Isaac Newton and a memorial plaque to Thomas Young are also to be found in the Abbey.

#### PORT OF LONDON

The development of the Port of London has been due to its situation on a very deep tidal river and to the expansion of the British Colonies and possessions during the last three centuries, which brought in overseas trade in all kinds of raw materials.

Approved For Release 2003/12/02<sup>88</sup> : CIA-RDP80-00926A002900050023-2

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

In its earliest days it was owned by the Crown but after the Norman Conquest, the City Corporation was given the right to collect revenues. In 1909 the Port of London Authority commenced its career by assuming the functions of the conservancy in the lower River and those of the old dock companies in the docks, with the special duty of improving the accommodation in the Port. Since 1909 the River channel has been widened and deepened.

The length of the dock quays in the Port is about 23 miles, the largest being the George V dock, 800 feet long.

#### THE ROYAL NAVAL COLLEGE AND THE NATIONAL MARITIME MUSEUM

The excursion to Greenwich will be by boat, leaving Westminster Pier and proceeding down the River Thames to Greenwich Pier. During the course of the journey several historic landmarks including St. Paul's Cathedral, London Bridge, the Tower of London and the Port of London will be visible.

On arrival at Greenwich visits will be made to the Royal Naval College, a building designed by Christopher Wren and erected on the site of Henry VIII's Palace, and the National Maritime Museum.

The Museum collection is not confined to the past, but includes many acquisitions dealing with the present century. Models of up-to-date warships and modern passenger liners, a panorama of an Atlantic Convoy being attacked by U-boats in 1943 and many original documents from the 1939-45 War can be seen.

#### THE HOUSES OF PARLIAMENT

The House of Lords, a lavishly decorated Gothic hall, has been used by the House of Commons since the destruction of their own chamber in May, 1941. The Speaker's chair is at the north end of the Chamber. In front of the chair is the table of the House, on which the mace rests during the sittings of the House. When the House is "in Committee" the mace is placed under the table. On either side of the table are the "front benches," the ministerial on the Speaker's right, the opposition on his left.

At the end of the Chamber above the Speaker's chair are the Reporters' Gallery and, at a higher level, the Strangers' Gallery. The galleries to right and left accommodate the Serjeant-at-Arms, the Peers, the Ambassadors and Distinguished Strangers. The House is flanked on each side by Division Lobbies, into which the members file when a vote is being taken. The Peers' Lobby, now serving as the Commons' Lobby, a handsomely decorated square chamber, has a fine

encaustic tiled pavement and brass gates in the South doorway. Over the North and South doors are the arms of six dynasties of English rulers.

The House of Commons, to which 100 members of the Congress are invited on July 19th, stands on the site of the former St. Stephen's Chapel—the meeting place of the English Commons for many centuries. The chapel was destroyed by fire in 1834. The present buildings are familiar in shape to all the world because they are reproduced on the back of the British Treasury pound note. They were completed in 1857. Big Ben, called after Sir Benjamin Hall, Commissioner of Works at the time, is of the same date. The Commons chamber was destroyed by a German bomb in the winter of 1940-41, and is now being rebuilt.

The oldest part of the present premises is Westminster Hall. Next to the Tower and Westminster Abbey, this is the most historic building in London. Begun in 1097, and rebuilt in 1397, its roof of English oak is the largest unsupported wooden roof in the world. The Hall was the scene of Charles I's trial; the last two English Kings have lain in state there.

#### THE ROYAL SOCIETY OF MEDICINE

The Royal Society of Medicine was founded in 1805 by a group of energetic medical men who had formed a habit of meeting at a tavern in the City of London "for the cultivation and promotion of physic and surgery."

In 1834 the Society received a Royal Charter and by this time was established in its own house in Berners Street. From there it removed to a magnificent old house in Hanover Square where it celebrated its first Centenary as the Royal Medical and Chirurgical Society, which was even then held of some importance in the world of scientific medicine.

In 1907 negotiations with a dozen similar scientific medical societies were successfully concluded and the Royal Medical and Chirurgical Society was reconstituted as the Royal Society of Medicine under a second Royal Charter.

In the reconstituted Society, now housed at No. 1 Wimpole Street, all the co-operating societies were represented as Sections and as such have Members and maintain their old traditions.

The Society's Roll now numbers over 9,000 and includes more than one thousand Fellows overseas of all nationalities.

#### THE ROYAL COLLEGE OF SURGEONS OF ENGLAND

The early history of the Royal College of Surgeons of England is the history of two Companies, the Barbers' Company of London, which is first mentioned in the records

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

preserved at Guildhall in 1308, and the Fellowship or Guild of Surgeons, first mentioned in the year 1369.

In 1493, the Barbers' Company and the Surgeons' Guild entered into an agreement to act together in all matters relating to Surgery and to the examination and government of its practitioners, and in 1540 the two Companies were united by Act of Parliament. The Union was immortalized in Holbein's masterpiece showing Henry VIII presenting the Act of Union to Thomas Vicary, the first Master of the United Company of Barbers and Surgeons. The *mariage de convenance* lasted for 200 years, and in 1745 an Act of Parliament was passed dissolving the union and establishing two separate Companies.

The Surgeons had to find a new home and after a temporary sojourn in Stationers' Hall, built premises in Old Bailey where Surgeons' Hall was opened in 1751. In 1796 a freehold site in Lincoln's Inn Fields was acquired upon which, with considerable extensions, the College Building now stands. In 1799 Parliament entrusted to the care of the Company the Hunterian Collection, which had been purchased for the Nation at a cost of £5,000, and in March, 1800, the Company was reincorporated and constituted with the name of the Royal College of Surgeons in London. The name of the College was changed to the Royal College of Surgeons of England in 1843, and at that date the Fellowship was instituted.

A large part of the College was destroyed by enemy action in 1941.

#### BRITISH MEDICAL ASSOCIATION HOUSE

The British Medical Association, founded in Worcester in 1832 by Sir Charles Hastings under the name of the Provincial Medical and Surgical Association and changing to its present name in 1856, has its headquarters at B.M.A. House in Tavistock Square, London, W.C.1. The Association exists to promote the medical and allied sciences and to maintain the honour and interests of the medical profession. The present membership is over 60,000.

B.M.A. House, originally constructed to house the Theosophical Society was taken over by H.M. Government early in the 1914-18 War, before the building had been completed. It was purchased by the B.M.A. in 1923 and the exterior finished and the interior redesigned under the direction of Sir Edwin Lutyens, R.A., who was the original architect. The House was officially opened by King George V on the 13th July, 1925, when the Gates of Remembrance were dedicated by the Archbishop of Canterbury.

The main building with its forecourt was completed in 1929 and the further extension of the North and South Wings commenced in 1938. The South extension was badly damaged by enemy action on 16th April, 1941, before the interior had

been completed. The repair and completion of this wing is now being undertaken.

The west end of the South Wing is built on the site of the house occupied by Charles Dickens between 1851 and 1860. The most brilliant part of his career was during this period and it was in this house that he wrote "Bleak House," "Hard Times," "Little Dorrit," "Tale of Two Cities" and "Great Expectations."

#### WINDSOR CASTLE AND GREAT FOSTERS

Situated on a hill overlooking the River Thames, twenty miles from London and with Eton College on the opposite bank, Windsor Castle is the oldest palace in England. It has been the home of every English King since William the Conqueror ousted the Saxons and turned Windsor from a hunting lodge into a fortress. It was from Windsor that King John rode forth in 1215 to sign Magna Carta. Queen Elizabeth summoned Shakespeare to Windsor and his play "The Merry Wives of Windsor" was the result of this command.

Within the Castle walls is St. George's Chapel, a splendid example of Perpendicular architecture, in the vaults of which lie the coffins of many English Kings, including those of Henry VIII and Charles I. The Castle contains a superb collection of pictures, an unique library, and many other historical and artistic treasures.

At Egham, five miles from Windsor, is the famous country hotel, Great Fosters. Dated A.D. 1550, some parts are said to go back to the reign of Henry VII, but the main building was probably built by Henry VIII, who confiscated the monastic lands to make for himself a "chace," where he could indulge in his favourite pastime of hunting. Queen Elizabeth constantly used Great Fosters as a hunting lodge, largely because it had been the home of her mother, Anne Boleyn. Today, Great Fosters is a country house hotel where modern installations have been introduced without in any way destroying the character of the house.

#### ETON COLLEGE

Eton College, the largest of the ancient English public schools, was founded by Henry VI in 1441. Its teaching now includes modern subjects, but until the first half of the 19th century the normal course of instruction remained wholly classical.

The buildings were started in 1441 but the whole original structure was not completed until 50 years later. This older part consists of buildings surrounding two quadrangles, those enclosing the lesser quadrangle containing the residence of the officials, the library and hall. The old chapel of the College

**Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2**

was also used as the Parish Church until the creation of the separate parish of Eton in 1875. As the numbers grew, a new chapel was erected and is now used by the lower school. This contains some admirable modern tapestries, glass and wood-work.

The principal annual celebration is held on June 4th, when speeches in the Upper School and the procession of boats are regular features of the day.

#### HATFIELD HOUSE

The home of the Marquess of Salisbury was built by Robert Cecil, 1st Earl of Salisbury, in 1607-1611, near the Palace of the Bishops of Ely, then occupied by James I but originally built by Cardinal Morton about 1490. Henry VIII took over the Old Palace at the Reformation and used it to keep his daughter, Mary Tudor, a prisoner. Later, as Queen Mary, she kept her sister, Elizabeth, confined there. Two of the wings of the Old Palace were pulled down to make the foundations of Hatfield House, and the remaining portion of the old building is a fine banqueting hall with a magnificent roof. It is one of the most typical palatial houses in England.

#### THE ROYAL BOTANIC GARDENS, KEW

The site of the Botanic Gardens at Kew has long been famous as a horticultural centre. In 1730 a house near the present Kew Palace, known as Kew House, was leased to Frederick, Prince of Wales, who thus inaugurated the long and intimate association of Kew with the Royal Family. Frederick did much to improve the Gardens and, after his death in 1751, his widow, Princess Augusta of Saxe-Gotha, mother of George III, continued the development and with the professional help of gardeners and architects founded a botanical, as distinct from a horticultural, establishment at Kew.

Princess Augusta died in 1772 and Kew came under the control of George III who owned Richmond Lodge, situated in the Old Deer Park at Richmond. The gardens and grounds of the Lodge joined those of Kew House and the King, by Act of Parliament, obtained powers to purchase Kew and unite the two properties. All those portions north of the Old Deer Park form what is now known as Kew Gardens. In 1840 the Gardens were given to the nation by Queen Victoria and placed under control of the Commissioners of Woods and Forests.

#### THE ZOOLOGICAL SOCIETY OF LONDON

The Society was established in 1826 and received the Royal Charter in 1829. The Zoological Gardens in Regent's Park

**Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2**

Approved For Release 2003/12/02 : CIA-RDP80-00926A002900050023-2

were first opened to the public on April 27th, 1828. Since then the grounds have been added to from time to time; at present the total area is about 35 acres.

#### OXFORD AND STRATFORD-ON-AVON

Oxford is, after Paris and Bologna, Europe's oldest university town. Its beginnings date from about 1167. The University was originally centred upon its church, St. Mary's, round which the principal university buildings still stand. Members of the Congress will be entertained at Christ Church—the College founded by Cardinal Wolsey in 1525—and will have opportunities of visiting both the university buildings and some of the more ancient colleges, notably Merton (1266) and New College (1387).

Stratford-on-Avon, in the county of Warwickshire, was a provincial market town in Elizabethan times and still possesses many buildings of that date. It stands on the edge of the one-time Forest of Arden. Here Shakespeare was born in 1564, and returned to die in 1616. He was baptised in the church where his monument stands—one of the most authentic portraits of him in existence. He was there married to Ann Hathaway, whose cottage still exists, as do the houses in Henley Street, in which Shakespeare's father plied his trade. The house—New Place—which Shakespeare later bought as a man of property, has disappeared.

#### CANTERBURY

The Roman occupation may be said to mark archaeologically the beginning of the City, at that time enclosed by walls. In Saxon times it became the Royal Capital of Ethelbert (560 A.D.), the first Christian King of Kent. In the middle of the ninth century the City was laid waste by the Danes, and again in 1011. The Cathedral originated as St. Augustine's Church (597 A.D.) which was largely rebuilt by Archbishop Odo. In 1023 Canute restored it, but it was destroyed by fire in 1067 and rebuilt by Lanfrane in 1077. In 1174 it was again destroyed by fire and was rebuilt gradually, the building of the central tower being undertaken in 1495. In 1162 Thomas à Beckett was elected Archbishop; eight years later he was murdered in the Cathedral. For three centuries the life of Canterbury centred in the pilgrimage to his shrine.

Various Sovereigns have visited the City, among them Edward the Black Prince with his prisoner, the King of France, after the Battle of Poitiers. Henry VIII, accompanied by Charles V of Spain and Cardinal Wolsey, visited the City in state in 1520. In 1524 he refounded the "King's School."

During the reign of Elizabeth many French and Walloon refugees settled in Canterbury and started new industries, the

best known of which was the silk weaving introduced by the Huguenot refugees in 1685.

#### CAMBRIDGE

In olden times Cambridge was distributed between the Mills and the Great Bridge along the banks of the River, which was responsible for its prosperity in those days, and which served as the means of supplying the necessities of life. Communication with the Eastern Counties and the Midlands was possible only by crossing the Great Bridge. The date of the foundation of the University has never been discovered, but doubtless the situation of the town and the neighbourhood of the monasteries contributed to the fact that the choice fell on Cambridge. The oldest College is Peterhouse, famous for its stained glass. The Great Court of Trinity, the Chapel of King's, and the entrance gates of St. John's are inevitable attractions. The banks of the River, as it winds through the land behind the Colleges—the "Backs"—provide a pleasant walk.

#### REPRESENTATIVES OF COUNTRIES, UNIVERSITIES AND SOCIETIES

Every country and university in the world has been invited to appoint an official representative. In cases where no nomination was received the corresponding Ophthalmological Society was asked to nominate a representative.

##### *Algiers*

Prof. A. G. Toulant (University of Algiers)

##### *Argentina*

Prof. R. Argañaraz (representing the Ophthalmological Society of the Argentine and the Facultad de Medicina de Buenos Aires)

Dr. P. Satanowsky de Neumann | Ophthalmological

Dr. Boris Malamud | Society of the

Dr. J. Lijo Pavia | Argentine

Dr. R. Laje Weskamp (Universidad Nacional de Cordoba)

Dr. J. N. Vila-Ortiz (Sociedad de Oftalmologia del Litoral)

##### *Australia*

Dr. J. Ringland Anderson (Government Representative)

Dr. C. K. Cohen (University of Sydney and New South Wales representative of the Ophthalmological Society of Australia)

Dr. D. Hart (University of Queensland)

Dr. Esmé Anderson (University of Melbourne)
